

## **Buy America & Buy American Act**

### **What is the .....**

**Buy American Act-** applies when the federal government is directly purchasing products or materials for a federal project that are designated as Domestic. Under this act there are two provisions to determine if a product is domestic: 1) it must be “manufactured\*” in the United States; and 2) the cost of domestic components must exceed 50% of the cost of all the components. (\*The Government Accountability Office (GAO) define “manufactured” as the completion of the (end product) in the form required for use by the government to be carried out domestically)

**Buy America Act-** requires Federal agencies to procure domestic materials and products. Two conditions must be present for the Buy American Act to apply: (1) the procurement must be intended for public use within the United States; and (2) the items to be procured or the materials from which they are manufactured must be present in the United States in sufficient and reasonably available commercial quantities of a satisfactory quality.

**ABH Manufacturing, Inc.** is committed to making it easy as possible to supply our products for projects subject to the Buy America & Buy American Act requirements.

Currently the following products listed below meet the requirements of each act:
