9K Series – Features

- For versatile applications, lever by knob trim variations are available.
- Rose locking pin and rose assembly design offers great torque resistance. It prevents the locking pin from twisting, bending, or breaking under attack.
- The innovative design of the slotted key release cam and locking lug assembly create maximum attack resistance. Even though damaged, the lock still allows key access. In addition, the lever is fully functional from the inside. The hub-mounted torsion spring and strong retractor springs help prevent lever sag and offer a smooth and snappy operation.
- Strong through-bolt mounting studs increase torque resistance. Heavy rose liner material is highly attack resistant.
- Strong retractor springs provide resistance to lever sag.
- Zinc hubs with a shrouded locking lug, guaranteeing higher quality and increased torque resistance.
- The outside lever sleeve is a seamless one piece construction made of a hardened steel alloy that provides additional reinforcement in the locking lug slot.
- Lost Motion feature available allowing 45° lever rotation in either direction without engaging retractor assembly.
- Interchangeable core allows for quick re-keying and customized masterkeying.

Certifications

ADA–Americans With Disabilities Act: 9K series – The design and operation of the BEST® cylindrical lock meets the intent of the standard for ANSI A117.1 section 404.2.6

Builders Hardware Manufacturers Association: 9K series – Listed by BHMA for A156.2, Series 4000, Grade 1.

Underwriters Laboratories®: 9K series: Listed by Underwriters Laboratories for use on 3 Hr, A label for single or double swinging doors.

Florida Building Code and Miami-Dade County Code: 9K series – 9/16" latch throw – Listed by Florida Building Code and Miami-Dade County

at ± 75 PSF for single doors. **9K series** – 3/4" latch throw – Listed by Florida Building Code and Miami Dade County at ± 80 PSF for single doors and ± 50 PSF for double doors. "WS" option must be ordered for the lock to include a "Miami-Dade County Product Control Approved" label for inspection purposes.

California State Fire Marshal: 9K series – Listed with California State Fire Marshal. 9K series 14 & 15 lever conforms with California Title 24.

Specifications & How to Order

9K Specifications

Backset	2-3/4" standard, 3-3/4" and 5" available.
Chassis	Critical latch and chassis components are brass or corrosion- treated steel. 2 1/16" diameter to fit 2 1/8" hole in door [Conforms to ANSI A115.2]. Lost Motion feature available as an option. [see page 5 for options/features].
Door Thickness	Available for 1 3/4" to 2 1/4" doors only. Spacers available for 1 3/8" doors
Roses	C – 3" Convex D – 3-1/2" Convex K – 3" Convex-no ring L – 3-1/2" Convex-no ring

Products protected by one or more of the following patents 5,590,555 5,794,472 Other products patent pending.

Finishes	BHMA	US	Description	BHMA	US	Description
		605	3	bright brass	619	15
	606	4	satin brass	622	19	flat black
	611	9	bright bronze	625	26	bright chromium
	612	10	satin bronze	626	26D	satin chromium
	613	10B	oxidized satin bronze, oil rubbed	690	20	dark bronze
	618	14	bright nickel plated			

Antimicrobial Finish 626AM satin chrome plated with UltraShield™ antimicrobial protected coating
NOTE: BEST's UltraShield™ option is recommended for use on any hardware application where product cleanliness is a high priority, i.e; Hospital/Healthcare, Elderly Care, Education, Transportation, Food-Service, Hospitality

Latch Solid brass 9/16" throw. Front 2-1/4" x 1-1/8" beveled

Lever Handles Lever handles are a high-quality zinc alloy. Trim components are brass or bronze. Body is approximately 5/8" in diameter; Handle is approximately 4-3/4" long [from center-line of chassis]. #14 and #15 levers conform to California Administrative Code Title 19 and Title 24. All three styles of levers conform to the Illinois Accessibility Standard.

Mounting In addition to standard door preparation (ANSI A115.2 for 1-3/4" doors), two additional holes are needed for through-bolts. Through-bolts require two 5/16" diameter holes located at 12 o'clock and 6 o'clock positions. A drill jig can be ordered to insure accuracy of the holes. [see KD303 page 5].

Projection on Door Approx. 2-3/4" when mounted on 1-3/4" door

Strike **STK:** Conforms to ANSI A115.2 [2-3/4" x 1-1/8" with curved lip & box].
S3: Conforms to ANSI A115.2 for 1-3/4" doors [4-7/8" x 1-1/4" with curved lip].
S3-7/8: Conforms to ANSI A115.2 for 1 1/4" doors [4- 7/8" x 1-7/8" flat]

			pages 6-9	pages 4-5	pages 4-5	page 11		page 5

* Handles are made from a zinc alloy, and have been plated to be equivalent in appearance to the finishes listed. For information on 9K non-IC products please refer to BEST's non-IC keying products brochure.

**RQE option requires modification to chassis and is sold with assembly unit only. 8KS2 Strike [Standard]

Shipping Weights

The chart is the approximate shipping weight for the standard 9K functions locksets. This weight includes the weight of the lockset with the "#15" style lever, "K" style rose, latch, strike package, and box. Listed separately are the approximate weights for "with core" and "less core" shipments.

Lock Function Nomenclature	Case Quantity	Shipping Weight With Core	Shipping Weight Less Core
Y	9		31 lbs
N	9		40 lbs.
L,NX,P	9		40 lbs.
AB,D,E,H,HJ,R,T	9	42 lbs.	40 lbs.
C,G,I,N,S,W	9	44 lbs.	40 lbs.

Lever Styles & Trim

Lever Features

Abrasive Lever Option

Besides complying with a wide variety of accessibility codes and ordinances, BEST lever handles are available with a special abrasive feature. Abrasive strip on the lever immediately identifies warnings on doors to hazardous areas for the blind.

To order: Designate "AL" on How to Order (page 3). Note: abrasive strip is available on all levers, except #14, #15, #16 levers in 613 finish.

Lost Motion Feature

The Lost Motion feature allows the lever handle to move 45 degrees from parallel to the horizontal plane without engaging the latchbolt assembly. When the lockset is in the locked mode, this feature makes over-torque or over-lever-age abuse more difficult to achieve.

To order: designate "LM" on How to Order (page 3).

Non IC Lever Option

The 9K heavy duty cylindrical lock may be adapted to existing keying systems by using a special retrofit lever and throw member that will accept 6 pin single shear-line cylinders from non BEST manufacturers. No internal modifications are required to adapt the 9K to cylinders from the following manufacturers: Corbin-Russwin, Medeco, Sargent, Schlage, Yale. Refer to BEST® non-IC keying products brochure for more details.

RQE Feature

The 9K lever handle cylindrical can be built to incorporate a request-to-exit (RQE) switch. A normally open switch provides momentary switch closure when the inside lever is rotated. RQE option requires modification to chassis and is sold with assembly unit only.

To order: designate "RQE" on How to Order (page 3).

Tactile Lever Option

Tactile levers may be used in areas where improved grip is required or as a warning in hazardous areas. Grooves are machined into the back of the hand grasp portion of the lever to improve grip and/or to provide a sensory warning in hazardous areas. This option can be used for Blind, Safety or Accessibility applications.

To order: Designate "TL" on How to Order (page 3).

CORMAX™ Patented Keying System

BEST® CORMAX™ is the premier patented keying system offered by BEST. CORMAX will meet your needs for security, key control, and convenience. A simple solution with no compromising allowed. CORMAX is the upgrade path for existing BEST Standard, Premium, and MX8 customers; and it is an essential element of non-residential access control as security administrators strive to eliminate the unauthorized duplication of keys.

CORMAX offers the following features and benefits:

- A long-term US utility patent that guarantees the extended useful life of the system through 2027.
- A second, independent locking mechanism that utilizes a patented set of built-in side pins to provide higher security.
- Several levels of geographical exclusivity, including national exclusivity, are available via the patented side pin feature.
- CORMAX cores and keys are available exclusively through BEST sales offices. Key blanks are only sold to individuals authorized by the customer to ensure key blanks do not end up in the possession of unauthorized personnel either inside or outside the customer's facility.
- CORMAX cores™ are certified to meet the security, safety, and reliability requirements of BHMA A156.5 Grade 1.
- Picking and drilling resistance options are available if higher levels of security are desired.
- Complete factory masterkeying service offered, and at no charge with purchase of BEST locksets and PHI exit devices.
- Keyways are organized in families of four keyways each, with double-milled and quad-milled key levels to facilitate the design of masterkey systems in multi-building campuses.
- BEST CORMAX cores are compatible with all existing BEST interchangeable core housings, eliminating the need for new or modified locksets.

Deadlocking Latches & Strikes

8KL3 Deadlocking Latch

Bolt throw: 9/16"

Backset: 2-3/4"

Front: 2-1/4" x 1-1/8" beveled

Tube: To fit 1" diameter hole in door edge

To order: (with unit) designate "9K3" on How to Order (page 3).

To order: (without unit) designate "8KL3-SL" (Spring Latch) or DL (Deadlocking Latch) and finish.

8KL4 Deadlocking Latch

Bolt throw: 9/16"

Backset: 3-3/4"

Front: 2-1/4" x 1-1/8" beveled

Tube: To fit 1" diameter hole in door edge

To order: (with unit) designate "9K4" on How to Order (page 3).

To order: (without unit) designate "8KL4-SL" (Spring Latch) or DL (Deadlocking Latch) and finish.

8KL5 Deadlocking Latch

Bolt throw: 9/16"

Backset: 5"

Front: 2-1/4" x 1-1/8" beveled

Tube: To fit 1" diameter hole in door edge

To order: (with unit) designate "9K5" on How to Order (page 3).

To order: (without unit) designate "8KL5-SL" (Spring Latch) or DL (Deadlocking Latch) and finish.

8KS3-7/8 Flat Strike

Dimension: Conforms to ANSI A115.2 for 1-3/4" doors (4-7/8" x 1-7/8" flat)

To order: (with unit) designate "S3-7/8" on How to Order (page 3).

To order: (without unit) designate 8KS3-7/8 and finish.

8KS3 Strike

Dimension: Conforms to ANSI A115.2 for 1-3/4" doors (4 7/8" x 1 1/4" with curved lip).

To order: (with unit) designate "S3" on How to Order (page 3).

To order: (without unit) designate 8KS3 and finish.

8KS2 Strike (Supplied Standard)

Dimension: Conforms to ANSI A115.2 for 1-3/8" doors (2-3/4" x 1-1/8" with curved lip and box)

To order: (with unit) designate "STK" on How to Order (page 3).

To order: (without unit) designate 8KS2 and finish.

Strikes & Door Preparation

Sample Specifications - Acceptable Manufacturers

A. Locksets and Latchsets

BEST - No Substitution.

1. Locksets and latchsets: ANSI A156.2, Series 4000, Grade 1 UL listed, extra heavy-duty cylindrical type.
2. Backset 2 3/4 inches [70mm]
3. Interchangeable core 7-pin: [Restricted keyway] [Patented] [Standard] [_____].
4. Locksets to have anti-rotational studs that are through-bolted.
5. Keyed lever with no exposed keeper hole.
6. Each lever to have independent spring mechanism designed to control lever only.
7. Outside lever sleeve seamless, 1-piece construction, hardened steel alloy.
8. Keyed Lever: Removable only after core is removed, by authorized control key, to allow access to knob keeper
9. Hub, side plate, anti-rotational studs 1-piece casting with shrouded locking lug.

B. Keys and Keying

- A. Cylinders: 7-pin, interchangeable core and keyed into a [New] [Existing] factory registered Grand Masterkey System with a [Standard] [Restricted] [Patented] keyway.
 1. Acceptable Material: Cylinders as manufactured by BEST.
- B. Provide construction cores and keys during construction period. Construction control and operating keys and cores are not part of permanent keying system or furnished on same keyway [or key section] as permanent keying system.
- C. Permanent Keys and Cores: Prepare permanent cores and keys in accordance with keying schedule. [Stamp with applicable key mark for identification.] [Do not stamp] [_____].
- D. Provide Grand Masterkeys, Masterkeys and other Security Keys.
- E. Furnish keys in the following quantities:
 1. [4] [_____] each Grand Masterkeys.
 2. [4] [_____] each Masterkeys per set.
 3. [2] [_____] each Change keys each keyed core.
 4. [6] [_____] each Construction masterkeys.
 5. [2] [_____] each Control keys.
- F. Return construction cores to [{BEST} factory representative] [Hardware manufacturer's representative].

Service Equipment

KD304A Boring Jig Kit

The KD304A jig kit is made for boring cut-outs in wooden doors for Fed. Spec. 160 and 161 series cylindrical/tubular locksets, doors 1-3/8" to 2-1/4" thick. The KD304A kit includes the boring jig (to drill wood doors for 2-3/8", 2 3/4", 3-3/4", and 5" backsets), a quick-release adaptor for 3/8" drill chuck, a 2 1/8" bit, and a 1" diameter x 9" bit.

The following kit items can also be purchased separately.

KD309 – 2-1/8" bit

KD318 – 1" dia. x 9" bit

KD319 – 3/8", quick release adaptor

To order complete kits specify: KD304A Kit

KD312 and KD315 Face Plate Marking Chisel and KD325 Strike Plate Location Pin

The KD315 face plate marking chisel (which locates the mortising for the faceplate) and the KD325 strike locating pin (which centers the strike for proper installation) and is used for Fed. Spec. 161 cylindrical lockset, (1-1/8" x 2-1/8"), and BEST® series 82T & 83T tubular locks. The KD312 face plate marking chisel is available for Fed. Spec. 160 (1" x 2-1/4") preparation.

To order specify: KD312– face plate marking chisel 1" (160)

KD315– face plate marking chisel 1-1/8" (161)

KD325– strike plate locating pin

KD303 Through-Bolt Drill Jig

Special accessory jig aids in aligning 5/16" holes for through-bolt mounting. Install the latch first, then insert jig in 2-1/8" bored hole, align with door edge and drill with 5/16" drill bit.

To order specify: KD303.

KD317 Spanner Wrench and KD340 Spring Tool

All 9K locksets require the use of KD317 spanner wrench for door removal. This tool is included 1 per every 9 locksets with your order. If more are needed, designate KD317 on your order. The KD340 lever return spring tool with its unique design feature is used when replacing the 9K lever return spring.

To order specify: KD340.
