34 ABOUT US

MAYFAIR[®]

BY BEMIS

A FOUNDATION OF INNOVATION

For 120 years, we've been all about a good place to sit. We began manufacturing children's wooden wagons. In 1932, Albert Bemis switched to toilet seats, capitalizing on his employees' woodworking expertise. Twenty years later, we innovated a compression molding process for enameled wood seats that's still in use today.

A FUTURE OF INNOVATION

We look forward to the future with confidence and an optimistic spirit of innovation and invite you to take a seat and see where the Bemis can-do spirit leads us next.

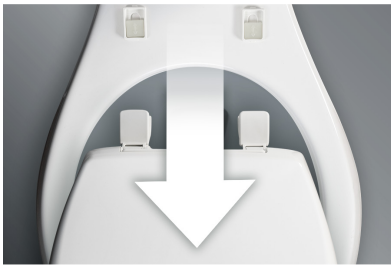

FEATURES

SUSTAINABILITY

REDISCOVERED WOOD

More than 4 million pounds of post-industrial wood shavings a month become recycled wood composite toilet seats marketed worldwide by Bemis.

Reclamation of wood waste minimizes air pollution and depletion of forest-based natural resources.

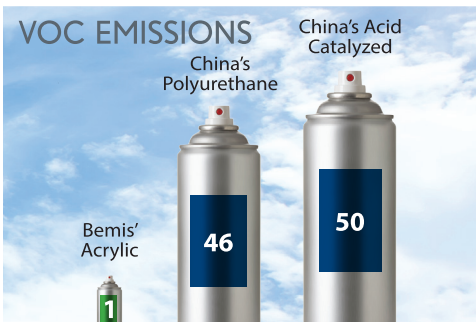

All toilet seats are packaged in recycled and recyclable corrugate.

RECYCLED PLASTICS

Processing product waste and post-consumer plastic keeps secondary materials from entering our landfills.

Co-injection molding, a process pioneered by Bemis, uses regrind waste in the cores of its products, instead of discarding it into landfills.

WATER-BASED PAINT

Environmentally friendly colorants and water-based paints significantly reduce VOC emissions.

Painting 12 enameled wood seats emits the same VOC emissions as a single can of 8 oz hair spray, which is up to 50 times less than other processes.

MADE IN THE USA

Family-owned since 1901, Bemis Manufacturing Company has been improving our customers' lives by creating seats engineered with innovative features and quality craftsmanship built in the USA. With a wide variety of materials and styles, our seats have features that simplify your life, while providing stability, comfort, and plenty of design choices. We take great pride in ensuring both value and quality in our innovative products for everyday life.
