

GLASS DOOR CONTROL

The CL4000GD lock is designed for use on interior doors, and will easily fit new installations or can be quickly retrofitted.

The CL4000GD is a medium duty electronic patch door lock offering all the functions of the CL4000. As standard the CL4000GD is supplied with a flat strike plate for fitting to solid door frames. When fitting to a glass door with a glass side panel you will need to buy the Rondo strike box.

- Suitable for interior use

LOCK MODELS

Electronic Patch Door Lock

Medium duty brushed steel latchbolt head with $\frac{5}{16}$ " (8mm) follower. Supplied with a flat strike plate for fitting to a solid door frame. Outside lever turns freely without operating the latchbolt. When a valid code is entered and the blue LED lights up, the lever will retract the latchbolt. When the door closes the spring latch will automatically lock the door. The key will open the door for management functions. The key may be used to set the lock into passage function so that anyone can open the door without using a code (classroom function tailpiece required). Passage function can also be programmed via the keypad.

FEATURES

Code Management

Program and manage codes via the keypad while the lock is on the door. All models also feature a Code Free option.

Remote Release

Two REM ports are provided for connection to exterior switches or alarm systems.

Storeroom Function

Fitted as standard i.e. the latch can be retracted by turning the key.

Classroom Function

Tailpiece supplied to allow (when fitted) lock to be left in passage function when the key is removed.

Rondo Strike Box

To use when installing to a glass door with a glass side panel as opposed to a solid frame. Available to purchase as a separate product.
