Applications

To provide the desired level of security, even the finest architectural hardware requires a properly designed and maintained master key system.

The keying system is the “software” of a building's security. As shown in the schematic below, it turns each hardware product into an access control device.

The choice of cylinder mechanism must be planned together with the keying system. The variety of mechanisms available from Corbin Russwin offers the right balance of security, convenience and expansion capability for every job.

Cylinders and Keys

Key Systems

Step 1

Determine the type of locking system

- Conventional "open & restricted keyways"
 - Not contract controlled
- Patented locking system
 - A notice of acceptance will be required between Corbin Russwin and Owner
 - Factory-based system
 - Key blank distribution restrictions are in place
- Security (secondary locking mechanisms, example; Access 3)
- High security (same as Security plus UL437 – example; Access 3 AHS)
- Standalone access control locking devices (at door wiring, example; IN120)
 - To facilitate multiple users through common doors
- Integrated locking systems (hard wired into access control systems)

Step 2

Establish the level of the master key system. The higher the level the less secure.

- Level two – "Simple Master Key system"
 - Change key, and master key only
- Level three – "Grand Master Key system"
 - Change key, master key, and Grand Master Key
- Level four – "Great Grand Master Key system"
 - Change key, master key, Grand Master Key, and Great Grand Master Key
- Levels higher than four are not recommended for security reasons
 - With more levels, additional master pins in each chamber of the cylinder would be required, and with the additional master pins the possibility of unauthorized key interchanges could occur

See pages 54-56 on How to Establish Key Systems.

Step 3

Establish key hierarchy, key issuing policies and procedures, and administrative disciplines.

- Who, if anyone is authorized to carry the top master key?
- Who carries master keys and change keys?
 - Does every employee receive a key?
- What disciplinary action(s) is being put in place for violations?
 - Fines or Deposits
 - > Lost keys
 - > Keys not returned

- Will there be a key receipt required?
 - > Where will that be kept?
- Who is the systems administrator?
 - Authorized to purchase
 - Responsible for Key Control Administration
- Who is the Key Control Administrator?
 - Maintain key control software & all transactions

Step 4

System Layout

- Helpful Hints
 - KISS "Keep It Simple System"
 - > Do not use the term sub-master (not unless it's level 6 and higher)
- Lowest level possible
- Key to the building security objectives NOT to the people
 - Determine if the system is to be designed for Security or Convenience
- No cross keying, especially with patented locking systems and higher
- Key alike within master key groups as much as possible
 - Avoid top-heavy systems (example; few change keys used under masters)
- Has the right function of lockset been selected?
 - Storeroom vs. Classroom vs. Entry
 - Single cylinder vs. double cylinder
 - > If double cylinder, how is the inside cylinder to be keyed?
- Provide adequate quantity of keys
 - Top Level Master keys: Quantity should be limited to absolute minimum required.
 - Master keys: Quantity should also be limited to only amount required.
 - Change keys per key set and/or per keyed alike sets
 - Special operating keys
 - > Control keys: A Control key is as important as a top level Master key in a removable core system and quantities should therefore be limited to minimum required.

Separate the internal departments into sectors, example are:

- Perimeter
 - Including all exterior doors, roof surfaces, gates and fences, and adjacent buildings.
- Operations
 - Sensitive areas crucial to daily operations, such as plant engineering, security and mechanical operations.
- Management
 - Areas that are vital for daily business activities, primarily human resources,

administration, executive offices, IT, sales, and accounting.

- Services
 - Areas that provide employees and visitors with services, such as restrooms, medical treatment areas, housekeeping, food service, retail (unless it's a leased outside source).
- Unique Applications
 - Door openings requiring access control hardware where key override is required, or any other special application which would be unique.
- Tenants
 - Any tenants that are not part of the building.

Step 5

Servicing & Maintenance

- In-house or outside locksmith
 - Ensure proper training
 - Establish key cutting log
 - Establish service request procedures
- Service equipment
 - Key kit
 - Code cutter that complies with systems depths & spacing specifications
 - Locksmithing tools, fixtures & accessories
- Establish stock levels & requirements to avoid misuse of multi-section key blanks
 - Additional cylinders ready for emergencies
 - Additional key blanks (of all keyways)
- Who or where are the key blanks going to be kept?
- Who is authorized to cut keys?
 - What form of work order will be used to authorize cutting of keys?
 - Who will sign the work order?
 - What records will be kept & where?
- What type of reports will be required?
 - Overdue keys
 - Miss-cut keys
 - > Who receives the reports?
- Once a key has been cut, what instructions are given to the recipient?
 - Key receipt recommended
- Ensure that all transactions are recorded by the Key Control Administrator
- ENFORCEMENT FROM THE START! SUPPORT AND BACK THOSE WHO ARE RESPONSIBLE FOR MAINTAINING AND SERVICING THE SYSTEM.

SimpleK

Key Systems

SimpleK

Master Key System and Key Management Software

SimpleK is a flexible and intuitive software program that streamlines and simplifies the complexities of managing master key systems, keys, and facilities. It combines all tools needed by locksmiths, facility managers, security officers, and anyone else involved in the key management processes.

The software provides total key control with audit trails, outstanding keys, overdue keys, tools for the rekeying process, and more. SimpleK software allows you to import maps and floor plans to see who has access to each individual door, the associated keys, and hardware on the opening.

SimpleK allows you to manage keys and keying systems of all sizes and types. This includes: Medeco, Corbin Russwin, ASSA ABLOY ACCENTRA™, SARGENT, ASSA, ABLOY, Schlage®, Best®, and many others.

Features:

- Advanced tools for locksmithing and key control
- Manage all key systems (unlimited number of records)
- Robust import tools to bring current data into SimpleK
- Interactive floor plans
- Master key system design and expansion
- Key requests, approvals, issuances, and returns workflow
- Cylinders and core pinning (verifies key interchange)
- Door-Key association visualization and rekeying solution
- Easily identify keys, access, and hardware on openings
- Visibility to audit trails and outstanding/overdue keys

SimpleK – Standard Edition

*For cylinder options, see pages 44-45

Finish	
Description	Specify
Bright Brass	605
Satin Brass	606
Bright Bronze	611
Satin Bronze	612
Dark Oxidized Satin Bronze, Oil Rubbed	613
Dark Oxidized Satin Bronze, Equivalent	613E
Bright Nickel Plated	618
Satin Nickel Plated	619
Flat Black Coated	622
Bright Chromium Plated	625
Satin Chromium Plated	626
Bright Stainless Steel	629
Satin Stainless Steel	630
Black Oxidized Bronze, Oil Rubbed	722
Black Suede Powder Coat	BSP
White Suede Powder Coat	WSP

All cylinder plugs are provided in 606 or 626, except for BSP cylinders for which BSP plugs are provided. CR2400 and CR8200 available in 606 or 626 only. Mortise and rim housings are provided in the finish ordered.

Cylinder and Key Stamping

Key Systems

Visual and Concealed Key Control

With these options, keys and/or cylinders are stamped with their respective keyset symbol, so lock mix-ups during installation or key mix-ups afterwards are less likely to happen – and easier to straighten out if they do. Lost keys are also easier to replace. The coded information on the cylinder tells you how the cylinder is keyed, thereby eliminating trial and error.

For example, the symbol AA1 shown in the illustration identifies the lock to be operated by grand master key A, master key AA and change key AA1. Upon written authorization from the building owner to an authorized Corbin Russwin Distributor, a bitting list can be furnished for each job to translate the symbols into key bittings.

If a key is lost, it can easily be replaced by referring to the symbol on the cylinder and the bitting on the bitting list. VKC is not available on Security or Pyramid cylinders.

Visual Key Control (VKC) For Greater Convenience

The key symbol is stamped on the plug face or other visible portion of the front of the cylinder. (VKC is available on all keys, but not available on Security, CK4400 Series Lockset or Pyramid cylinders.)

Concealed Key Control (CKC) For Greater Security

For greater security, specify CKC on the cylinders. The key symbol is stamped in a concealed location, such as the rear of the cylinder. It is not visible to the general occupants of the building but can be accessed by authorized personnel upon removing the cylinder from the lockset.

The following codes and definitions have been established for specifying cylinder and key stamping:

Quick Code	Definition
VKC0	No keyset, registry number, keyway, nor bitting stamping on any keys. Includes master keys and change keys. (Keys will be tagged.)
VKC1	Master keys stamped with their keyset symbol and registry number. Change keys stamped with their keyset symbol and keyway.* (Standard for high security and security cylinders.)
VKC2	Master Keys stamped with their keyset symbol and registry number. Change keys stamped with their keyset symbol and keyway.* Cylinders stamped with their keyset symbol on the face of the plug. (Not available for high security or security cylinders.)
VKC3	Master Keys stamped with their registry number. Change keys stamped with their bitting, keyway* and system. Cylinders stamped with their keyset symbol on the face of the plug. (Not available for high security or security cylinders.)
CKC2	Master keys stamped with their keyset symbol and registry number. Change keys stamped with their keyset symbol and keyway.* Cylinders stamped with their keyset symbol in a concealed location.
CKC3	Master keys stamped with their registry number. Change keys stamped with their bitting, keyway* and system. Cylinders stamped with their keyset symbol in a concealed location. (Not available for high security, or security cylinders.)

*Keyway will NOT be stamped on the keys for security or high security cylinders, nor restricted or protected keyways unless specifically requested as per the purchase order. (KB18, KB19, KB28 or KB90 series)

Construction Master Keying

Construction Master Keying (CMK) is a Corbin Russwin keying option that provides the extra security needed in the transition from construction of a building or complex to completion.

The construction master key operates all Corbin Russwin cylinders while the building is under construction. Upon completion of the construction phase, it can be voided without removing the cylinders from the locks, simply by turning the change key in each cylinder.

Construction master keying is not available for interchangeable core. Temporary cores are available for IC jobs that require construction keying.

The permanent master and change keys for the system are always packed and shipped separately, and the order must include the names and addresses of individuals to whom the construction, permanent master and change keys should be sent.

This feature is NOT available on interchangeable core, Access 3, Pyramid, or Security series cylinders.

SKD Caution

Unless otherwise specified, SKD sets will be construction master keyed. When construction master keying is established for SKD sets, Corbin Russwin issues a separate SKD CMK key as well as an SKD CMK Control key if required.

How to Order CMK

To order locksets and/or cylinders with the construction master key feature, the quick code CMK should be indicated as an option.

Temporary Construction Cores

Lockable

A secure method of construction keying for interchangeable core hardware is the use of temporary construction cores. Corbin Russwin recommends this method of construction keying for IC jobs.

Hardware is furnished with construction cores that are keyed alike to a combination unrelated to the permanent system's master key. When the building is turned over to the owner, the permanent cores are installed and the temporary construction cores can be returned to Corbin Russwin for credit.

The IC temporary construction cores are available in red, blue and green. The color options enhance the user's ability to easily control access to different locations on a construction site, or identify different locations for specific keying applications.

How to Order Lockable

IC 6-pin with Red temporary construction core (Red), CT6R
 IC 6-pin with temporary construction core (Blue), CT6B
 IC 6-pin with temporary construction core (Green), CT6G
 IC 7-pin with temporary construction core (Red), CT7R
 IC 7-pin with temporary construction core (Blue), CT7B
 IC 7-pin with temporary construction core (Green), CT7G

Examples:

ML2051 x LSA x 626 x RH x CT6R
 CL3355 x NZD x 626 x CT6B
 CR1080 x 114 x A01 x 626 x CT6G
 Permanent cores must be ordered separately.

Disposable

Corbin Russwin offers two formats of disposable temporary cores. These cores do not require keys for their operation and no returns or credits are allowed.

Disposable cores are available for Corbin Russwin large format interchangeable core (LFIC) housings or for small format interchangeable core (SFIC) housings.

How to Order Disposable

LFIC
 For 6-pin, use quick code CT6D
 For 7-pin, use quick code CT7D

Examples:

ML2051 x LSA x 626 x RH x CT6D
 CR1070 x 114 x A01 x 626 x CT6D
 Permanent cores must be ordered separately.

SFIC - Key-in-lever/knob locksets
 For 6- and 7-pin, use quick code CTSD

SFIC - Mortise Locks and Exit Devices-Rim Cylinders
 For 6-pin housing, use quick code CLS6
 For 7-pin housing, use quick code CLS7

Conventional Key Systems

Mortise Cylinders

For use with all mortise locks and DL3000 Deadlocks. IC: page 15. Security: page 17. Master Ring: page 21. Pyramid: page 25.

Type	Length	Cam	Pins	Keyway	Finish	Plug Finish
CR1000	100 1" (5 pin only)	(see page 41)	5 (1" length only)	(see pages 32-40)	605	606
	118 1-1/8" (standard)	A01 Cloverleaf	6 (standard)		606	606
	114 1-1/4"	A02 Straight	7 (available for 1-1/4"-3")		611	606
	138 1-3/8"	A03 Adams Rite® MS			612	606
	112 1-1/2"	DL3000 Deadlock			613	606

	234 2-3/4"	A62 MR Straight / CR900 Series Mullion			630	626
	300 3"	A92 Exit Grip Trim 01 & 02			722	606
	314 3-1/4"	A93 Obsolete deadlocks: Corbin® 610 Series and Russwin® 1403 Series			BSP	BSP
	312 3-1/2"				WSP	626
	334 3-3/4"					

Flexible Head Mortise Cylinders

Use Flexible Head mortise cylinders only with sectional trim mortise locks. The head is spring-loaded to adjust for minor variations in door thickness. See page 21 for Master Ring

Type	Length	Cam	Pins	Keyway	Finish	Plug Finish
CR1100	100 1" (6-pin std.)	(see page 41)	6 (standard)	(see pages 32-40)	605	606
	118 1-1/8"	A01 Cloverleaf	7 (available for 1-1/4" - 1-1/2")		606	606
	114 1-1/4"	A02 Straight			611	606
					612	606
					613	606
					618	626
					619	626
					625	626
					626	626
					722	606
					BSP	BSP
					WSP	626

Concealed Shell Mortise Cylinders

Concealed shell cylinders are for mortise locks using "Plug Only to Show" escutcheon trim.

Type	Length	Cam	Pins	Keyway	Finish
CR1200	100 1" (6-pin std.)	(see page 41)	5 (1" length only)	(see pages 32-40)	606
	118 1-1/8"	A01 Cloverleaf	6 (standard)		626
	114 1-1/4"	A02 Straight	7 (available only for 1-1/4" - 1-1/2")		
	138 1-3/8"				
	112 1-1/2"				

All cylinder plugs are provided in 606, 626, or BSP finish

Length is measured from behind the cylinder head to the end of the cam.
For cam illustrations and applications, see page 41.

Conventional Key Systems

Hotel Function Cylinders

Change Keys and all normal master keys have limited rotation to retract latchbolt only. Emergency Master Key (EMK) and display key turn 360° to operate deadbolt as well.

Cylinder for Obsolete Exit Device

For inside of obsolete Corbin® 3726 1/2 and 3727 1/2 and Russwin® 736 1/2 and 737 1/2 only. Cam rotation is limited by steel pins on back of shell.

Type	Number	Remarks
Standard	CR1001-114-A01	Cylinders are 6-pin. Display and Emergency Master Keys are cut on 7-pin blanks
Flexible Head	CR1101-118-A01	
Concealed Shell	CR1201-114-A01	

Not available with D1, D2, L1, L2, 752, 852 or A Class keyways. Order with A91 cam to accept discontinued Russwin® "G" type long EMK.

Finishes: see Standard, Flexible Head and Concealed Shell Cylinder sections, page 8.

Application	Number	Remarks
Folger Adam® NS400 Series x LEK	CR1004-118-A02	Clockwise
Folger Adam NS400 Series x LEK	CR1005-118-A02	Counterclockwise

Finishes: 605, 606, 611, 612, 613, 625, 626, 629, 630, 722

1006-118-A02 (6-pin only)

Finishes: 605, 606, 611, 612, 613, 622, 625, 626, 629, 630, 722, BSP, WSP

All cylinder plugs are provided in 606 or 626, except for BSP cylinders for which BSP plugs are provided. Mortise housings are provided in the finish ordered.

Thumbturn Cylinders

Classroom function cylinders have a pin to block cam rotation in the locking direction. The pin may be installed on either side of the cam, depending on the hand of the door.

Suffix cam number to basic cylinder number. Example: 1300-118-A03					
Function	Length	Basic Number	A02 (147F77)	A03 (111F55)	A93 (281F27)
Standard	1"	CR1300-100-	•	•	N/A
	1-1/8"	CR1300-118-	•	•	•
	1-1/4"	CR1300-114-	•	•	N/A
	1-3/8"	CR1300-138-	•	•	N/A
Classroom	1"	CR1303-100-	N/A	•	N/A
	1-1/8"	CR1303-118-	N/A	•	N/A
	1-1/4"	CR1303-114-	N/A	•	N/A
	1-3/8"	CR1303-138-	N/A	•	N/A

Finishes: 605, 606, 611, 612, 613, 622, 625, 626, 629, 630, 722, BSP, WSP

All 1300- and 1303- thumbturn cylinders are available with the M34 Option (Ergonomic Thumbturn)

Dummy Cylinders

These cylinders may be used to fill an opening left when mortise cylinder operation is no longer desired.

Number	Length
CR1400-118	1-1/8"
CR1400-114	1-1/4"
CR1400-138	1-3/8"

Finishes: 605, 606, 611, 612, 613, 622, 625, 626, 629, 630, 722, BSP, WSP

Interchangeable Core

Key Systems

Fast changeover - new security in seconds!

Large Format Interchangeable Core

Options:

- 7-Pin
- VKC (Visual Key Control)
- CKC (Concealed Key Control)
- Restricted/Protected Keyways
- Pyramid
- Access 3

Advantages

Rekeying can be done by non-technical personnel without removing hardware from the door. When used system-wide, LFIC provides tremendous rekeying convenience.

When planned from the inception of a system, LFIC cylinders can be integrated with conventional cylinders.

Applications

LFIC is recommended for virtually all types of keying systems, such as office buildings, hotels, schools, hospitals and universities. When used in exit devices and other installations which are labor intensive to rekey, LFIC saves time and money over the life of the building.

Small Format Interchangeable Core

Advantages

Small Format Interchangeable Cores (SFIC) provide a cost effective retrofit option for other manufacturers' SFIC products without having to replace existing locking hardware. Utilizing a standard A2 or A4 pinning specification, Corbin Russwin SFIC is available in the following Best keyways: A, B, C, D, E, F, G, H, J, K, L, and M.

Operations

All operating keys (change, master, grand master) operate the lock normally. To rekey, use the special control key. The control key operates at a separate shear line in certain chambers within the core. Only the control key is required to remove and install a core.

Cores

6-pin standard; 7-pin, security and Pyramid optional. Two nickel silver change keys furnished standard per core. Control keys only furnished when ordered. LFIC Cylinders are not available keyed random.

Key Control

Corbin Russwin cores are available with protected and restricted keyways, patented keyways, security and Pyramid to deter unauthorized key duplication. No orders for patented protected keys, security or Pyramid keys will be shipped for a keying system without a letter of authorization from the end user.

Cores

6-pin or 7-pin SFIC cylinders are available either uncombined or master keyed. Corbin Russwin will provide master keying services for new SFIC systems only. Systems utilizing SFIC cannot be combined with any other Corbin Russwin key systems and cannot be supplied keyed random. Two operating keys are furnished per core. Control keys are not supplied unless specified.

Note: If keying is not specified at the time of order, SFIC cylinders will be supplied as uncombined.

Large Format Interchangeable Core

Construction Keying

Temporary cores are available for LFIC jobs that require construction keying.

Core Marking

Concealed Key Control (CKC) is available for all Corbin Russwin cores. Visual Key Control (VKC) is available for conventional cores, but not for security or Pyramid cores.

Ordering LFIC Locksets and Exit Devices

For specific product availability and Quick Codes for cylinder options, see "How to Order" in each catalog section.

Small Format Interchangeable Core

Construction Keying

Temporary cores are available in 6-pin for SFIC jobs that require construction keying.

Ordering SFIC Locksets and Exit Devices

For specific product availability and Quick Codes for cylinder options, see "How to Order" in each catalog section.

Master Ring

Key Systems

- Greater master keying capacity
- Superior keying flexibility
- Greater security in each cylinder

Advantages

6-pin Master Ring keying systems offer keying capacity similar to 7-pin conventional cylinder systems.

There is, however, far greater flexibility for asymmetrical keying systems, because change key combinations do not require any direct relationship to those of master keys. In conventional systems, combinations not needed under a given master key cannot be used elsewhere in the system. In master ring, they can. This frees thousands of combinations for use anywhere within a master ring system.

Since the master keys all have their own shear line, fewer master pins are used, increasing cylinder security. This security enhancement reduces the chances of cylinders being manipulated by stray keys. It also hinders surreptitious entry by picking and impressioning.

When planned from the inception of a keying system, conventional cylinders may be integrated into specific parts of a Master Ring system for areas where the required hardware does not accommodate the large Master Ring cylinders.

Applications

Corbin Russwin Master Ring cylinders are especially recommended for installations which require large and complicated keying systems, such as hospitals and universities.

Field Serviceability

Corbin Russwin Master Ring cylinders are fully field serviceable.

Note: Master Ring cylinders are not available uncombined.

Key Control

Restricted and protected keyways are available.

Construction Master Keying

When planned from the inception of a keying system, construction master keying is available.

Operation

The change key rotates the cylinder plug only. Master keys operate at the master ring, which is a sleeve around the plug.

Cylinder Marking

Visual Key Control (VKC) and Concealed Key Control (CKC) are available for Master Ring cylinders.

Ordering Locksets and Exit Devices with Master Ring Cylinders

For specific product availability and Quick Codes for cylinder options, see "How to Order" in each catalog section.

Pyramid

Key Systems

Description

Pyramid cylinders are available in both high security and security versions. The high security version is certified by Underwriters Laboratories to UL437 standards.

Applications

Especially recommended for installations requiring superior protection against picking, drilling and other surreptitious entry. Ideally suited for Educational and Healthcare facilities, Industrial and Commercial buildings.

System Administration & Key Control

Key control will be maintained through compliance with Corbin Russwin's Security Policy: for a copy contact Key Systems Administration or visit our web site at www.corbinrusswin.com.

All new Pyramid systems will require a completed System Information Document (orders cannot be entered without this document). The fully executed original document will be kept on file at Corbin Russwin Key System Administration. For all subsequent orders a letter of authorization will be required if the product is shipped to an address other than what is recorded on the System Information Document and/or if the address on the purchase order is different than what is listed on the System Information Document. Note that Key System Administration will not keep blanket letters of authorization on file.

Product Specification

All cylinders shall employ a protected locking mechanism that requires the use of a protected key and is furnished with a minimum of 7 pins. High Security cylinders shall meet the requirements of UL437. Interchangeable cores shall meet the drill resistance and pick resistance of UL437.

Keys shall be nickel silver and furnished with a large bow.

Features	Benefits
<ul style="list-style-type: none"> High security protection (UL437) standard 	<ul style="list-style-type: none"> Underwriters Laboratory listing for resistance to picking & drilling

 *A (suffix) refers to cylinders of pick and drill resistance.

UL Underwriters Laboratories Inc.

(UL437)BP8976
 Pyramid CR1020, CR2020, CR3020 Fixed Core (FC) series only

Finishes

Pyramid cylinders are available in all Corbin Russwin standard finishes.

Keying

7 pin with two nickel silver change keys per cylinder. Pyramid fixed core security cylinders may be uncombined (specify UC)¹, master or grand master keyed to a specific facility. Note: Pyramid cylinders are not available "0" bitted.

Keys shipped separately for master keyed cylinders.

System Specifications

- Pyramid systems are independent and cannot be keyed into existing and/or conventional systems.
- Pyramid cylinders are to be keyed to factory-generated bittings only.
- Cross keying is not available.

Key Discard Policy & Warranty

See page 53.

Construction Master Keying

Pyramid cylinders are not available construction master keyed. Interchangeable core jobs can be furnished with temporary construction cores. Temporary construction cores will be unrelated to the permanent system's master key. When the permanent cores are installed, the temporary construction cores are returned to Corbin Russwin for credit.

How to Order Example

- Mortise lock with temporary construction core
Qty. - ML2051 - LSA - 626 - RHR - CTP
- Mortise cylinder with temporary construction core
Qty. - CR1080-114-A01-626-CTP
- Permanent core ordered separately
Qty. - AA1 - CR8020 - 626

Pyramid Quick Codes²

PS	Pyramid Security Fixed Core
PCS	Pyramid Security Interchangeable Core
PHS	Pyramid High Security Fixed Core
PCHS	Pyramid High Security Interchangeable Core
CTP ³	Pyramid with Temporary Construction Core
CLP ³	Pyramid Less Core

- UC cylinders are supplied, less keys, pins, springs and pin covers.
- When cylinders are ordered with locks.
- Pyramid cores to be ordered as a separate line item.

Pyramid Key Systems

Performance Features

Shell

- Locking pin mechanism
- Hard metal inserts

Key

- Control pin

Plug

- Blocking plate
- Hard metal inserts

Pins & Springs

- Hardened stainless steel pick-resistant bottom pins*
- Hardened stainless steel pick-resistant top pins*
- Hardened stainless steel pick-resistant master pins (if required)*
- Hardened stainless steel pick-resistant build-up pins (if interchangeable core)*
- Springs

Collar

- Solid recessed (mortise)

* Hardened stainless steel pins used for UL437 High Security versions only. Pyramid Security version uses nickel silver bottom pins and brass master, build-up and top pins.

Operation

Without Key

Locking pin mechanism engages blocking plate and prevents the plug from turning.

With Key

Key's control pin depresses the locking pin mechanism and allows the plug to turn.

Pyramid

Key Systems

Keys

- Nickel silver
- Key Bow Type 28
- Ordering example: 7PIN-28-XXXX
Keyway
- Ordering example P6 Keyway:
7PIN-28-XXXX-SPCXX
Keyway Side Pin Code

Back Side Stamping & Options

- Key set (VKC1), standard – unless otherwise indicated
- System registry number will be stamped on upper-level keys unless otherwise indicated
- Concealed key control (CKC2) available on cylinders
- Visual key control (VKC2 and VKC3) not available on cylinders. CKC3 also not available.

Note: Refer to Corbin Russwin's general catalog and price book for complete detailed information.

Keyway Security

Pyramid keyways will be determined by the supervisor of Key Systems Administration. Assignment will be based on the overall system requirements and geographic location to provide maximum protection to the owner. For security reasons, the keyway profiles are not shown.

Mortise Cylinders

Mortise Locks/Deadlocks

For use with all Corbin Russwin ML2000, ML2000HS and ML2200 (discontinued) mortise locks. DL4000 & DL3000 Series Deadlocks.

Conventional

Bump Resistant Cylinders

Key Systems

Protect your building from unwanted entry with Corbin Russwin bump-resistant cylinders. Our bump-resistant cylinders deter bumping without compromising the cylinder's structural integrity and strength. This option is available with Corbin Russwin conventional and Pyramid protected security and high-security cylinders on our mortise, cylindrical and exit device hardware.

Recently, a lot of information has been circulating about bumping, a technique used to defeat cylinders. Although this method has been around for a number of years, the internet has increased public awareness. Bumping is when a "bump key" is inserted into the cylinder and struck using a mallet or hammer type object. The bump key is specifically designed to transfer the energy from the force of the blow to create a separation in the cylinder's pins which compromises the lock allowing it to open.

Although BHMA has yet to establish bump-resistance standards, Corbin Russwin Bump Resistant Cylinders were tested and verified by an independent testing lab. They conclusively resisted bumping attack and did not allow entry. Verification and testing data is available upon request.

Bump-Resistant Cylinders:

- Specify "BRP"

Retrofit:

- Convert existing cylinders with Bump-Resistant Top Spool Pins

Features

Bump-resistant cylinders are designed for use with all Corbin Russwin locking hardware:

- Cylindrical locks
- Mortise locks
- Exit devices
- Access control locks
- Unit locks
- Auxiliary locks

Factory bitted, a symbol BRP is stamped onto pin cover/slides. Interchangeable core cylinders are not available with bump-resistant pinning.

BRP pinned mortise cylinder

BRP pinned rim cylinder

BRP pinned key-in-lever cylinder

Bump-Resistant Top Spool Pins

Description	Part Number	Qty
Conventional	628F10-7-171	Vials of 100 pcs.
Pyramid A	628F10-7-142	Vials of 100 pcs.
Pyramid C	628F10-7-236	Vials of 100 pcs.

Standard Bows

10
The standard bow furnished for all keyways unless otherwise specified. The other side is blank.
Example: L4-6PIN-10.

11
Blank both sides, for use when more area is required for stamping, such as custom die stamps.
Example: L4-6PIN-11.

12
This bow enhances key control. Recommended for Corbin Russwin restricted & protected keyways.
Other side blank.
Example: 62A1-6PIN-12

13
For use only on U.S. Government projects.
Example: L4-6PIN-13.

Large Bows

51
Blank both sides. Recommended for special die stamps or large amounts of stamping, and for Control and Emergency Master Keys. Not available for 752, 852 or A Class keyways.
Example: L4-6PIN-51.

52
This bow enhances key control. Recommended for Corbin Russwin restricted & protected keyways which need extra space for special stamping.
Not available for 752, 852 or A Class keyways.
Example: 62A1-6PIN-52

53
For use only on U.S. Government projects. Recommended for use when a large amount of stamping is required. Not available for 752, 852 or A Class keyways.
Example: L4-6PIN-53.

Security Bows (Inactive - for Existing Systems Only)

90

Standard bow for security keys. Example: L4-6PIN-90.

91

Blank both sides for security keys where extra stamping is required. Example: L4-6PIN-91.

92

This bow enhances key control. Recommended for Corbin Russwin restricted & protected keyways. Other side blank. Example: 62A1-6PIN-92

93

For use only on security keys for U.S. Government projects. Example: L4-6PIN-93.

Hotel Security Key Blanks

Standard hotel function mortise cylinders CR1001 and CR1011 use 7-pin Emergency Key blanks. The 51 bow is suggested e.g., L4-7PIN-51. All other Corbin Russwin hotel function cylinders require keys with a special undercut tip. The four variations are shown below.

-E1 Suffix

For interchangeable core mortise cylinder CR1081 (conventional) and CR1091 (Security). Available 6-pin only. Examples: L4-6PIN-51-E1 or L4-6PIN-90-E1.

-E8 Suffix

For CLX3329, CL3329 and CL3629 and obsolete CL3429 key-in-lever locksets, fixed core and IC. Available 6- and 7-pin. Example: L4-6PIN-51-E8.

-E4 Suffix

For CK4229 locksets, fixed core and IC, conventional and security. Also for CK4429. Available 5- or 6-pin. Examples: L4-6PIN-51-E4 or L4-6PIN-90-E4.

-E5 Suffix

For obsolete 1429, 3333EM, 4333EM and 5629 key-in-knob locksets. Available 5- and 6-pin. Example: L4-6PIN-51-E5.

Front Side

Back Side

28

Standard bow furnished for all Pyramid keys.

Ordering Example

Keyways

Key Systems

Multiplex/Simplex Keyways

Multiplex keyways can be used together to expand a keying system. A simplex keyway is independent, stands alone and cannot be tied into any other keyway to expand a keying system.

All/Multi-Section/Single Section Keys

All/Multi-section keys can be used on more than one cylinder with different sections. For example: a key cut on the L41 multi-section keyblank will pass cylinder in the L1, L2, L3 and L4 keyways. Single section keys can be used with cylinders of the same section. For example: a key cut on the L4 single section keyblank will only pass a cylinder in the L4 keyway.

Active Keyways

Keyways which are available for new Corbin Russwin keying systems are considered active. In the case of new master key systems, the factory reserves the right to select the keyway from a range of standard keyways, based on usage in a particular geographical area.

Inactive Keyways

Many older Corbin Russwin keyways are designated inactive. **No new systems** shall be established on these keyways. However, they continue to be available to support existing keying systems.

Restricted Keyways

For security reasons, these keyway profiles are not shown.

Protected Keyways

Key Systems Administration reserves the final decision as to which protected keyway family will be selected. A notice of acceptance showing the facilities name, address and contact information is required before orders can be processed. For security reasons, these keyway profiles are not shown.

Pyramid Keyways

Pyramid keyways are only available for Pyramid cylinders and separate specifications are used from conventional Corbin Russwin keying systems. For security reasons, these keyway profiles are not shown. All new Pyramid

systems will require a completed System Information Document (orders cannot be entered without this document). The fully executed original document will be kept on file at Corbin Russwin Key System Administration. For all subsequent orders a letter of authorization will be required if the product is shipped to an address other than what is recorded on the System Information Document and/or if the address on the purchase order is different than what is listed on the System Information Document. Note that Key System Administration will not keep blanket letters of authorization on file.

Bitting Classes

Corbin Russwin has several sets of dimensional standards for bitting (cutting) keys. If the wrong specifications are used when making keys on code machines in the field, they will not operate in conjunction with factory supplied cylinders and keys. The bitting class is given for each group of keyways. All bitting specs are available in the Corbin Russwin cylinder manual.

Corbin Russwin Cylinder Plug Diameters

When combining Corbin Russwin cylinders, the diameter of the plug determines the set of bottom pin and build-up pin lengths to use. The plug diameter is either .509" or .552". All Pyramid cylinders have a plug diameter of .496" and have their own pin kit. Current Corbin Russwin cylinder plug diameters are listed below by product series. Before 1983, however, all Corbin® X Class cylinders used .509" diameter plugs.

Cylinder	Lock Type	Diameter
CL3200 Series*	Security Bolt	.509"
CL3100, CLX3300, CL3300, CL3500, CL3800 Series	Cylindrical	.509"

Key-in-Lever/Knob Separately

Keypad	Cylinder	Lockset Series	Pins	Keyway	Finish
AA1	CR2000	033	7	L4	626

LFIC Cores Separately

Keypad	Cylinder	Pins	Keyway	Finish
AA1	CR8000	7	L4	626

Single System Pin Kits

For the end user with one Corbin Russwin System 70 keying system to maintain. Each kit has all pins necessary to combine interchangeable core and master ring cylinders, as well as conventional cylinders (both .509" and .552" plug diameters). Furnished in a handsomely finished hardwood case with combining instructions on the inside of the lid. Includes key gauge, tweezers and both diameter plug followers.

PK-70-ZDH

For pinning all types of cylinders (except security) with Z Class keyways: 59, D, H and L Series, plus 60, 70 and restricted/protected keyways using System 70 depths (1-6).

PK-70-X

For pinning all types of cylinders with X Class keyways: 27, 57, 67 and 77 Series, plus AR, BR, BL, 97 and 99 using System 70 depths (1-6).

PK-70-N

For pinning all types of cylinders with N Class keyways: N1-N28 using System 70 depths (1-6).

Security Pin Kit

PK-70-HS

For security cylinders, including interchangeable core, Brink and blockout function. Furnished in a handsomely finished hardwood case with combining instructions on the inside of the lid. Includes tweezers.

Deluxe Pin Kit

PK-1070

Ideal for locksmiths and distributor service personnel who must service a variety of Corbin Russwin keying systems. Also for end users with Pre-System 70 keying systems.

Contains all pins required to combine standard, IC and master ring cylinders. Accommodates System 70 and non-System 70 for both plug diameters and all key classes. Furnished in a reinforced steel case with combining instructions on the inside of the lid. A separate, removable, two-sided chart contains pin lengths for all modern key classes. Includes tweezers and both diameter plug followers.

PK-20-HS

Each pin kit has all the pins necessary to combine standard and interchangeable core Pyramid High Security cylinders. Includes tweezers, plug follower, key gauge and combining instructions.

PK-20-PS

Each pin kit has all the pins necessary to combine standard and interchangeable core Pyramid Security Cylinders. Includes tweezers, plug follower, key gauge and combining instructions.

Replacement Pins

Key Systems

For a complete listing of all Cylinder Components, refer to Cylinder/Owner's Manuals.

How to Order Conventional Pins

Suffix 3-digit length in thousandths of an inch to base number.

Example: .160" bottom pin is 553F482-160.

Description	Number
Specify quantity of vials (100 pins/vial):	
Bottom Pins (L Series)	553F484-2 + length
Master/Top/Build-up Pins (M Series)	553F492 + length
Spool Top Pins (J Series)	553F502 + length
Specify quantity of vials (1500 balls/vial):	
Construction Balls	546F978
<ul style="list-style-type: none"> • Pins are packaged in a secure, spill-proof plastic vial with hinged top. • 12 vials per master carton. 	

How to Order Security Pins

Replace the "x" in the part number with the pin's skew number.

Bottom pins use skews **L** (1) and **R** (2).

Master pins use skews **L** (1), **R** (2) and **S** (3).

Example: #2 master pin with S skew is 407T334-097.

Description	Number
Specify quantity of pins (must be multiple of 20):	
Bottom Pin, #2	407T4x4-242
Bottom Pin, #3	407T4x4-270
Bottom Pin, #4	407T4x4-298
Bottom Pin, #5	407T4x4-326
Bottom Pin, #6	407T4x4-354
Master Pin, #2	407T3x4-097
Master Pin, #3	407T3x4-125
Master Pin, #4	407T3x4-153
Top Pin #1 (long)	407T43-4193
Top Pin #2 (short)	407T43-4158

How to Order Pyramid Security Pins

Suffix 3-digit length in thousandths of an inch to base number.

Description	Number
Specify quantity of vials (100 pins/vial):	
Bottom Pins (Nickel Silver)	695F244 + length
Master/Build-up Pins/Top (Brass)	695F252 + length

How to Order Pyramid High Security Pins

Suffix 3-digit length in thousandths of an inch to base number.

Description	Number
Specify quantity of vials (100 pins/vial):	
Bottom Pins (Stainless Steel)	695F247 + length
Master/Build-up Pins/Top (Stainless Steel)	695F257 + length

How to Order Pyramid Bump Resistant Pins

Description	Number
Specify quantity of vials (100 pins/vial):	
Size A	628F107142
Size C	628F107236

How to Order Pyramid P6 Side Pins

Description	Number
Specify quantity of vials (20 pins/vial):	
P6 Side Pin	630F494

Service Equipment

Key Systems

Cylinder Tool Kit No. CT-93

Kit No. CT-93 contains the following items (also available separately):

CT-4	Follower for 509" diameter plugs
CT-11	Key gauge for Corbin® X and Z Class System 70 and pre-System 70
CT-19	Tweezers
CT-21	Key gauge for Russwin® N Class System 70 and pre-System 70
CT-22	Key gauge for Russwin DH Class System 70 and pre-System 70
CT-23	Key gauge for Russwin 981 and 852 Classes
CT-54	Follower for .552" diameter plugs

Pyramid Tools

CT-20	Pyramid plug follower (.495" diameter)
CT-20K	Key Gauge for Pyramid

Other Tools

CT-5	Pin Chamber Reamer
CT-7	Pin Chamber Burring Tool
CT-10	Loading tool for CK4400 Series and IC cylinder shells

Cylinder Installation Wrench No. CT-80

CT-80 is for interchangeable core mortise cylinders. It is used to:

- Install and remove Corbin Russwin interchangeable core mortise cylinder housing without marring cylinder scalp finish.
- Test cam operation before fastening the mortise cylinder set screw.
- Align the pins of the throw member before installing the core.

CT-80

Screws	
438F418	Cam screw, mortise cylinder and RFC padlocks
438F428	Cam screw, IC mortise cylinder
488F088	Mortise cylinder set screw packet (1 screw), standard cylinder size
488F108	Mortise cylinder set screw packet (1 screw), master ring
021F688	Rim cylinder mounting screw, 2-9/32" long for 1-3/8" - 2-1/2" doors
021F718	Rim cylinder mounting screw, 3-1/8" long for 2-3/4" - 3-1/2" doors
Disposable Core 10 Packs	
627F009	Corbin Russwin LFIC
707F219	Corbin Russwin SFIC
Tailpieces	
655F008	5/8" horizontal for rim cylinder CR3000-058
655F018	5/8" horizontal for IC rim cylinder CR3080-058
582F298	1-1/4" horizontal for IC rim cylinder CR3080-114
490F558	1-3/8" horizontal for rim cylinder CR3000-138
253F858	1-7/8" horizontal for IC rim cylinder CR3080-178
483F098	1-7/8" vertical for IC rim cylinder CR3080-178V
253F768	2" horizontal for rim cylinder CR3000-200
413F488	2" vertical for rim cylinder CR3000-200V
284F138	3-1/8" horizontal for IC rim cylinder CR3080-318
253F778	3-1/2" horizontal for rim cylinder CR3000-312
413F498	3-1/2" vertical for rim cylinder CR3000-312V
778F778	For CR2000-031 & CR2000-031H cylinders
778F768	For CR2000-031-7 & CR2000-031H-7 cylinders
622F308	For CR2000-033 & CR2000-034-7 cylinders
622F298	For CR2000-034-6 cylinder
682F298	For CR2000-037 & CR2000-033-7 cylinders
596F898	For CR2000-038 cylinder
489F028	For CR2000-051 cylinder
680F608	For CR2000-039 cylinder
681F068	For CR2000-039L cylinder
862F998	For CLX3300 Mechanical Functions (1-3/8" - 2" doors) 6-pin
863F018	For CLX3300 Mechanical Functions (1-3/8" - 2" doors) 7-pin
863F008	For CLX3300 Mechanical Functions (2-1/4" doors) 6-pin
863F028	For CLX3300 Mechanical Functions (2-1/4" doors) 7-pin
886F140	For CLX3300 Electrified Functions (1-3/8" - 2" doors) 6-pin
886F160	For CLX3300 Electrified Functions (1-3/8" - 2" doors) 7-pin
886F150	For CLX3300 Electrified Functions (2-1/4" doors) 6-pin
886F170	For CLX3300 Electrified Functions (2-1/4" doors) 7-pin
Rim Cylinder Back Plates	
253F758	For standard and Pyramid rim cylinders
135F108	For master ring rim cylinders
Retainers	
173F798	.020" thick for CR2001 -051 cylinder
368F918	.030" thick for rim, CR2200, CR2210 & CR3000 Series cylinders
488F928	.032" thick for CK4200 and 1400/4300 Series locks
333F997	For CK4400 Series Locks, 4300 Series Cylinders, 8000 cores and Pyramid
655F415	For CR3080 IC rim cylinder
680F645	Threaded cap for CR2000-033, 034, 037, 039, Security & Pyramid KIL cylinders
585F312	Cap pin for above
Springs (Ordered in multiples of 100)	
585F327	For CR2000-033, 034, 037, 039, Security & Pyramid KIL cap pin)
792F997	IC Conventional & Security
603F207	Fixed Core Conventional & Security
026F757	Hotel Mortise blocking pin
697F507	All Pyramid Cylinders
314F987	For CR2001-034 indicator
Spring Covers	
217F422	5-pin brass (Rim/Mortise/IC)
217F442	6-pin brass (Rim/Mortise/IC/Pyramid IC)
314F887	6-pin stainless (2000 Series Knob/Lever)
217F432	7-pin brass (Rim/Mortise/IC/Pyramid Rim & Mortise)
585F397	7-pin stainless (2000 Series Lever/Pyramid KIL/KIK)
411F092	Pyramid KIL/KIK for other manufacturers products (2200 Series)

Procedures

Corbin Russwin keying systems utilize the Standard Key Coding System illustrated on the following pages. To ensure prompt and accurate processing, purchase orders should be written using these key symbols to describe each master keyed item. In addition to the key symbol, Corbin Russwin requires the following information on the keying system for ALL orders:

- End User (job) Name
- City, State, Zip Code
- Special key bows or key stamping
- VKC/CKC requirements (see page 6)

New Systems or New Branches of Existing Systems

Indicate system expansion in terms of estimated numbers of key combinations, not doors. All of this information is essential at the inception of a keying system in order for Corbin Russwin to ensure accommodation of the end user's present and future needs. Advise as follows:

- How many levels of keying?
- Plan for a construction master key?
- Any selective master keys, such as ENG?
- How many changes for each master?
- How many masters for each grand master? If mixing Corbin Russwin cylinder types, indicate clearly where each type of cylinder will be used within the expansion parameters:
 - Which masters or grands have security cylinders under them?
 - Which have interchangeable cores?
 - Which have master ring?
 - Which have conventional cylinders?

Existing System Add-Ons

For prompt processing, orders must include a positive identification for the keying system in addition to the job name, city, state and zip code. Any ONE of the following is positive ID:

- Registry number stamped on any existing factory master key
- Previous factory order number together with the year of that order

Letters of Authorization

No letter is needed when the items are to be drop shipped directly to the end user. In all other cases, to preserve the security of the end user's keying system, Corbin Russwin requires a letter of authorization on the end user's letterhead to obtain the following:

- Bitting lists
- Security blanks and cut keys
- Master level cut keys
- Protected key blanks, cylinders and plugs
- Pyramid key blanks, cylinders, and plugs

The letter of authorization can be brief but should include a specific description of what is being authorized for release, and a positive key system identification.

Pyramid Key Discard Policy

It is essential that cut keys and key blank distribution policies and procedures be maintained and enforced for all Pyramid products.

Authorized Pyramid Distributors

Pyramid is a system-based product. An authorized distributor can stock Pyramid upon specific written authorization from the primary systems administrator of the facility. Authorized distributors have the ability to receive product, key product, cut keys and distribute the product to the facility.

Authorized Pyramid distributors who carry inventory for a specific system must provide valid receipts and disbursements of all Pyramid products, specifically key blanks/cut keys. All Pyramid key blanks to be maintained in the possession of an authorized Pyramid distributor must be accounted for. Any defective, incorrectly cut or damaged Pyramid key blanks must be retained in the distributor's possession to be reviewed and collected by a representative of ASSA ABLOY Door Security Solutions.

XYZ Corporation

**1 Main St.
Anytown, USA 00001
(203) 555-5555**

(Current Date)

Corbin Russwin Architectural Hardware
Key Systems Dept.

We authorize Acme Distributors to obtain a copy of the bitting list for our keying system GGMX5555. We also authorize them to order the quantities of master keys on our attached purchase order 1234AB.

Sincerely,

Gordon Morris
Security Director

Pyramid Primary System Administrators

Any defective, incorrectly cut or damaged Pyramid key blank must be destroyed.

Pyramid Key Warranty

Pyramid key blanks are covered by a 5-year warranty as outlined in the current list price book.

How to Establish Key Systems

Key Systems

To Specify a Simple Master Key System (2 Levels of Keying)

The master key symbol consists of TWO letters, such as **AA**. The change key numbers are added to the master key letters. The numbers come FIRST: **1AA**, **2AA**, **3AA**, etc.

When locks are required which are not operated by the master key or other change keys in the system, they are referred to as "single keyed" and given symbols **SKD1**, **SKD2**, etc. When all higher levels of master keys are to be disallowed, suffix **(NMK)** to the symbol of the key which is to operate. This means

"not master keyed." Cylinder **1AA(NMK)** is operated by **1AA** only. The **AA** master is blocked from operation.

To Specify a Grand Master Key System (3 Levels of Keying)

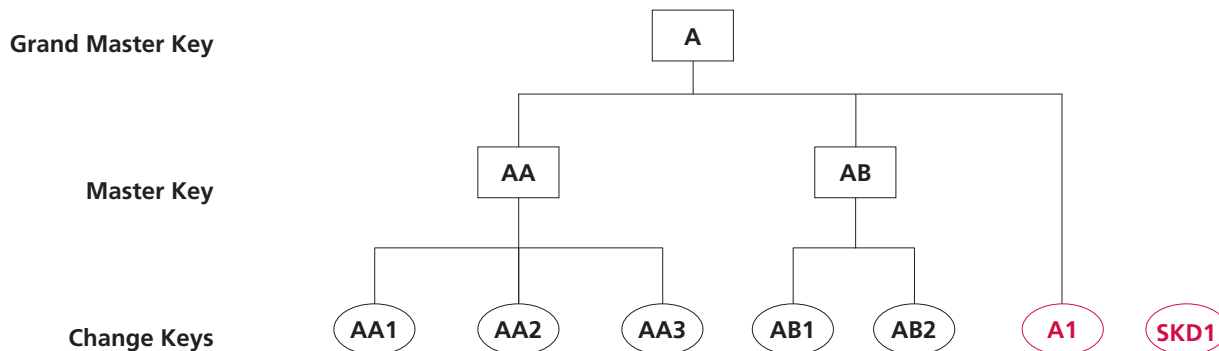

The grand master is assigned any ONE letter, such as **A**. The master keys under this grand are assigned TWO letters, the first of which must be the same as the grand: **AA**, **AB**, **AC**, etc. are all masters under grand **A**. Masters **BA**, **BB**, **BC**, etc., are all under grand **B**. Caution: Do not use the letters **I**, **O** or **Q** because of possible confusion with the numerals 1 and 0, respectively. Also do not use the letter **X** due to confusion with cross keying. Change key numbers come after the letters.

For master keys beyond **AZ**, insert a numeral between the letters to designate which pass through the alphabet they represent. **A2A** through **AZZ** represents the second pass of masters under grand **A**. **A3A** through **A3Z** would be the third. Change keys under these masters have the numbers suffixed in the usual way: **A2A1**, **A2A50**, etc.

If the cylinder is to be operated by its change key and nothing lower than the single lettered GMK, the change number is added to the GMK symbol. This is illustrated by the example **A1** in the schematic shown.

When locks are required which are not operated by ANY master keys or other change keys in the system, they are referred to as "single keyed" and given symbols **SKD1**, **SKD2**, etc.

When all higher levels of master keys are to be disallowed, suffix **(NMK)** to the symbol of the key which is to operate. This means "not master keyed" and can be applied to any level in the system. Cylinder **AA1 (NMK)** is operated by **AA1** only. The **AA** master and **A** grand are blocked from operation. Cylinder **AA (NMK)** would be operated by the **AA** master only. Grand **A** does not operate.

How to Establish Key Systems

Key Systems

To Specify a Great Grand Master Key System (4 Levels of Keying)

The great grand master key is assigned the symbol **GGM**. The rest of the symbols are the same as those in 3-level systems: The GMKs are assigned single letters, e.g., **A, B, C, D**, etc. Caution: Never use **X** for a grand master key due to the confusion which will result with cross keying symbols presented on page 53.

Masters under each GMK are assigned two letters, the first of which is the same as its respective grand master key. Change key numbers come *after* the letters. Changes

under the grand (**A1, B1**, etc.) and masters beyond **AZ** are handled exactly as in the 3-level system already described.

Changes directly under a grand are also handled as illustrated in the 3-level system. For changes directly under the **GGM** with no intermediate level masters, the change number is added directly to **GGM** as shown by the example **GGM1** in the schematic.

When locks are required which are not operated by ANY master keys or other change keys in the system, they are referred to as "single keyed" and given

symbols **SKD1, SKD2**, etc.

When all higher levels of master keys are to be disallowed, suffix (**NMK**) to the symbol of the key which is to operate. This means "not master keyed" and can be applied to any level in the system. Cylinder **AA1 (NMK)** is operated by **AA1** only. The **AA** master, **A** grand and **GGM** are all blocked from operation. Cylinder **AA (NMK)** is operated by the **AA** master only. Grand **A** and the **GGM** do not operate. Cylinder **A (NMK)** would be operated by the **A** grand only, without the **GGM**.

Great Grand Master

Selective Master Keys

It is often useful in large keying systems to issue a high level master key to maintenance personnel which allows access across all master and grand master key boundaries of a keying system. A selective master key is usually very close to the system's top master key, both physically and through its realm of access. Nevertheless, it must be blocked from operating in many areas.

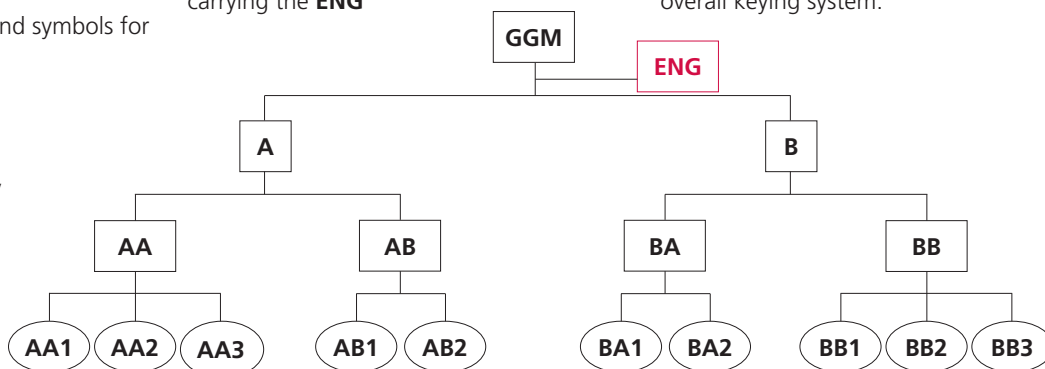

The most common names and symbols for selective master keys are:

- ENG** Engineer's key
- ATT** Attendant's key
- JAN** Janitor's key
- HKP** Housekeeper's key
- GRD** Guard's key
- MAIN** Maintenance

To designate that a lock be operated by a selective master key, suffix the symbol in parentheses to the standard symbol. Example: **AA1 (ENG)**. This must be added *every time* the selective key is to operate and left off whenever the selective key is NOT to operate. For instance, you may lay out a system in which key **AA1** is to operate two different offices. Inside one of them is an electrical cabinet which must be accessible to maintenance personnel carrying the **ENG**

key. That lock must be specified as **AA1 (ENG)** while the lock for the other office must be specified as **AA1**. Change keys directly under the selective key, such as **ENG1**, are operated by all higher level keys, such as **GGM**.

Like cross keying, a selective master key is a convenience feature which decreases the security of the cylinders it operates and limits the expansion and flexibility of the overall keying system.

How to Establish Key Systems

Key Systems

Convenience May Reduce Cylinder Security and Hinder System Expansion

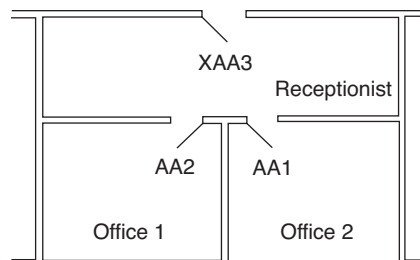

Whenever two or more different keys such as **AA1** and **AA2** are both required to operate the same cylinder, the cylinder's security is reduced. This is called *cross keying*. When the cross keying occurs under all the same higher level keys, such as **AA1** and **AA2**, it is known as *controlled cross keying*. When it combines keys under different higher level keys, such as **AA1** and **AB1**, it is known as *uncontrolled cross keying*.

In addition to reducing the security of the cylinder, cross keying usually imposes limits on the flexibility and expansion of the overall keying system. This is especially true of uncontrolled cross keying. For these reasons, it is strongly recommended to allow personnel to carry more than one key. Cross keying should be discouraged whenever possible. However, when cross keying is required, it is specified as follows, and should be summarized at the beginning of each order.

Case #1

Cylinder requires its own change key. The illustration depicts part of a small medical building where two doctors share a common receptionist. The receptionist gets the **AA3** key. Each doctor carries a key which operates only one office, but is also cross keyed into the entrance from the corridor.

Determine the symbol of the change key (example: **AA3**). Then prefix the letter X (example: **XAA3**). Then list all keys which are to operate in an "operated by . . ." phrase. Example: "**XAA3** operated by **AA1**, **AA2**, **AA** and **A**". Note that **X** is a cylinder specification only. The keys for cylinder **XAA3** are designated **AA3**.

XAA3 operated by AA1, AA2, AA and A.

Case #2

Cylinder does NOT require its own change key. This illustration depicts a section of a floor in a dormitory. Each student's bedroom key operates the hall door lock. There is no need to construct a key which operates only the hall door.

In this case, place an **X** at both the beginning and end of the symbol and a number between them. Example: **X1X**, **X2X**, etc. Again, *always include the "operated by . . ." phrase with a complete listing of key symbols to operate.*

X1X operated by AA1 through AA6, AA and A.

Notes

Key Systems

The ASSA ABLOY Group is the global leader in access solutions. Every day, we help billions of people experience a more open world.

ASSA ABLOY Opening Solutions leads the development within door openings and products for access solutions in homes, businesses and institutions. Our offering includes doors, frames, door and window hardware, mechanical and smart locks, access control and service.
