

HUBBARDTON FORGE®

# Coastal Outdoor Finishes

Hubbardton Forge offers some of the most robust, environmentally-friendly finishes available for exterior lighting fixtures, and continuously works to improve durability with new formulations that are rigorously tested.

The American Architectural Manufacturers Association, who sets the standards for coating performance on architectural applications, has recently designated all of our Coastal Outdoor Finishes as AAMA 2604-rated, meeting the highest standard in durable, weather resistant finishes available. They are corrosion-resistant and color-fast, with significant protection against harmful UV rays. These coatings deliver exceptional hardness and scratch resistance for enhanced

performance in seacoast environments. AAMA 2604-rated finishes, also known as “Super Durable Polyester powders”, are the same quality and standard that is used on aluminum-clad buildings. Why is this important? So that your exterior lighting fixtures remain not just beautiful, but protected, for years to come. Need LEED credits? These powder coat finishes emit zero-VOCs and can contribute toward your LEED certification, according to the US Green Building Council.

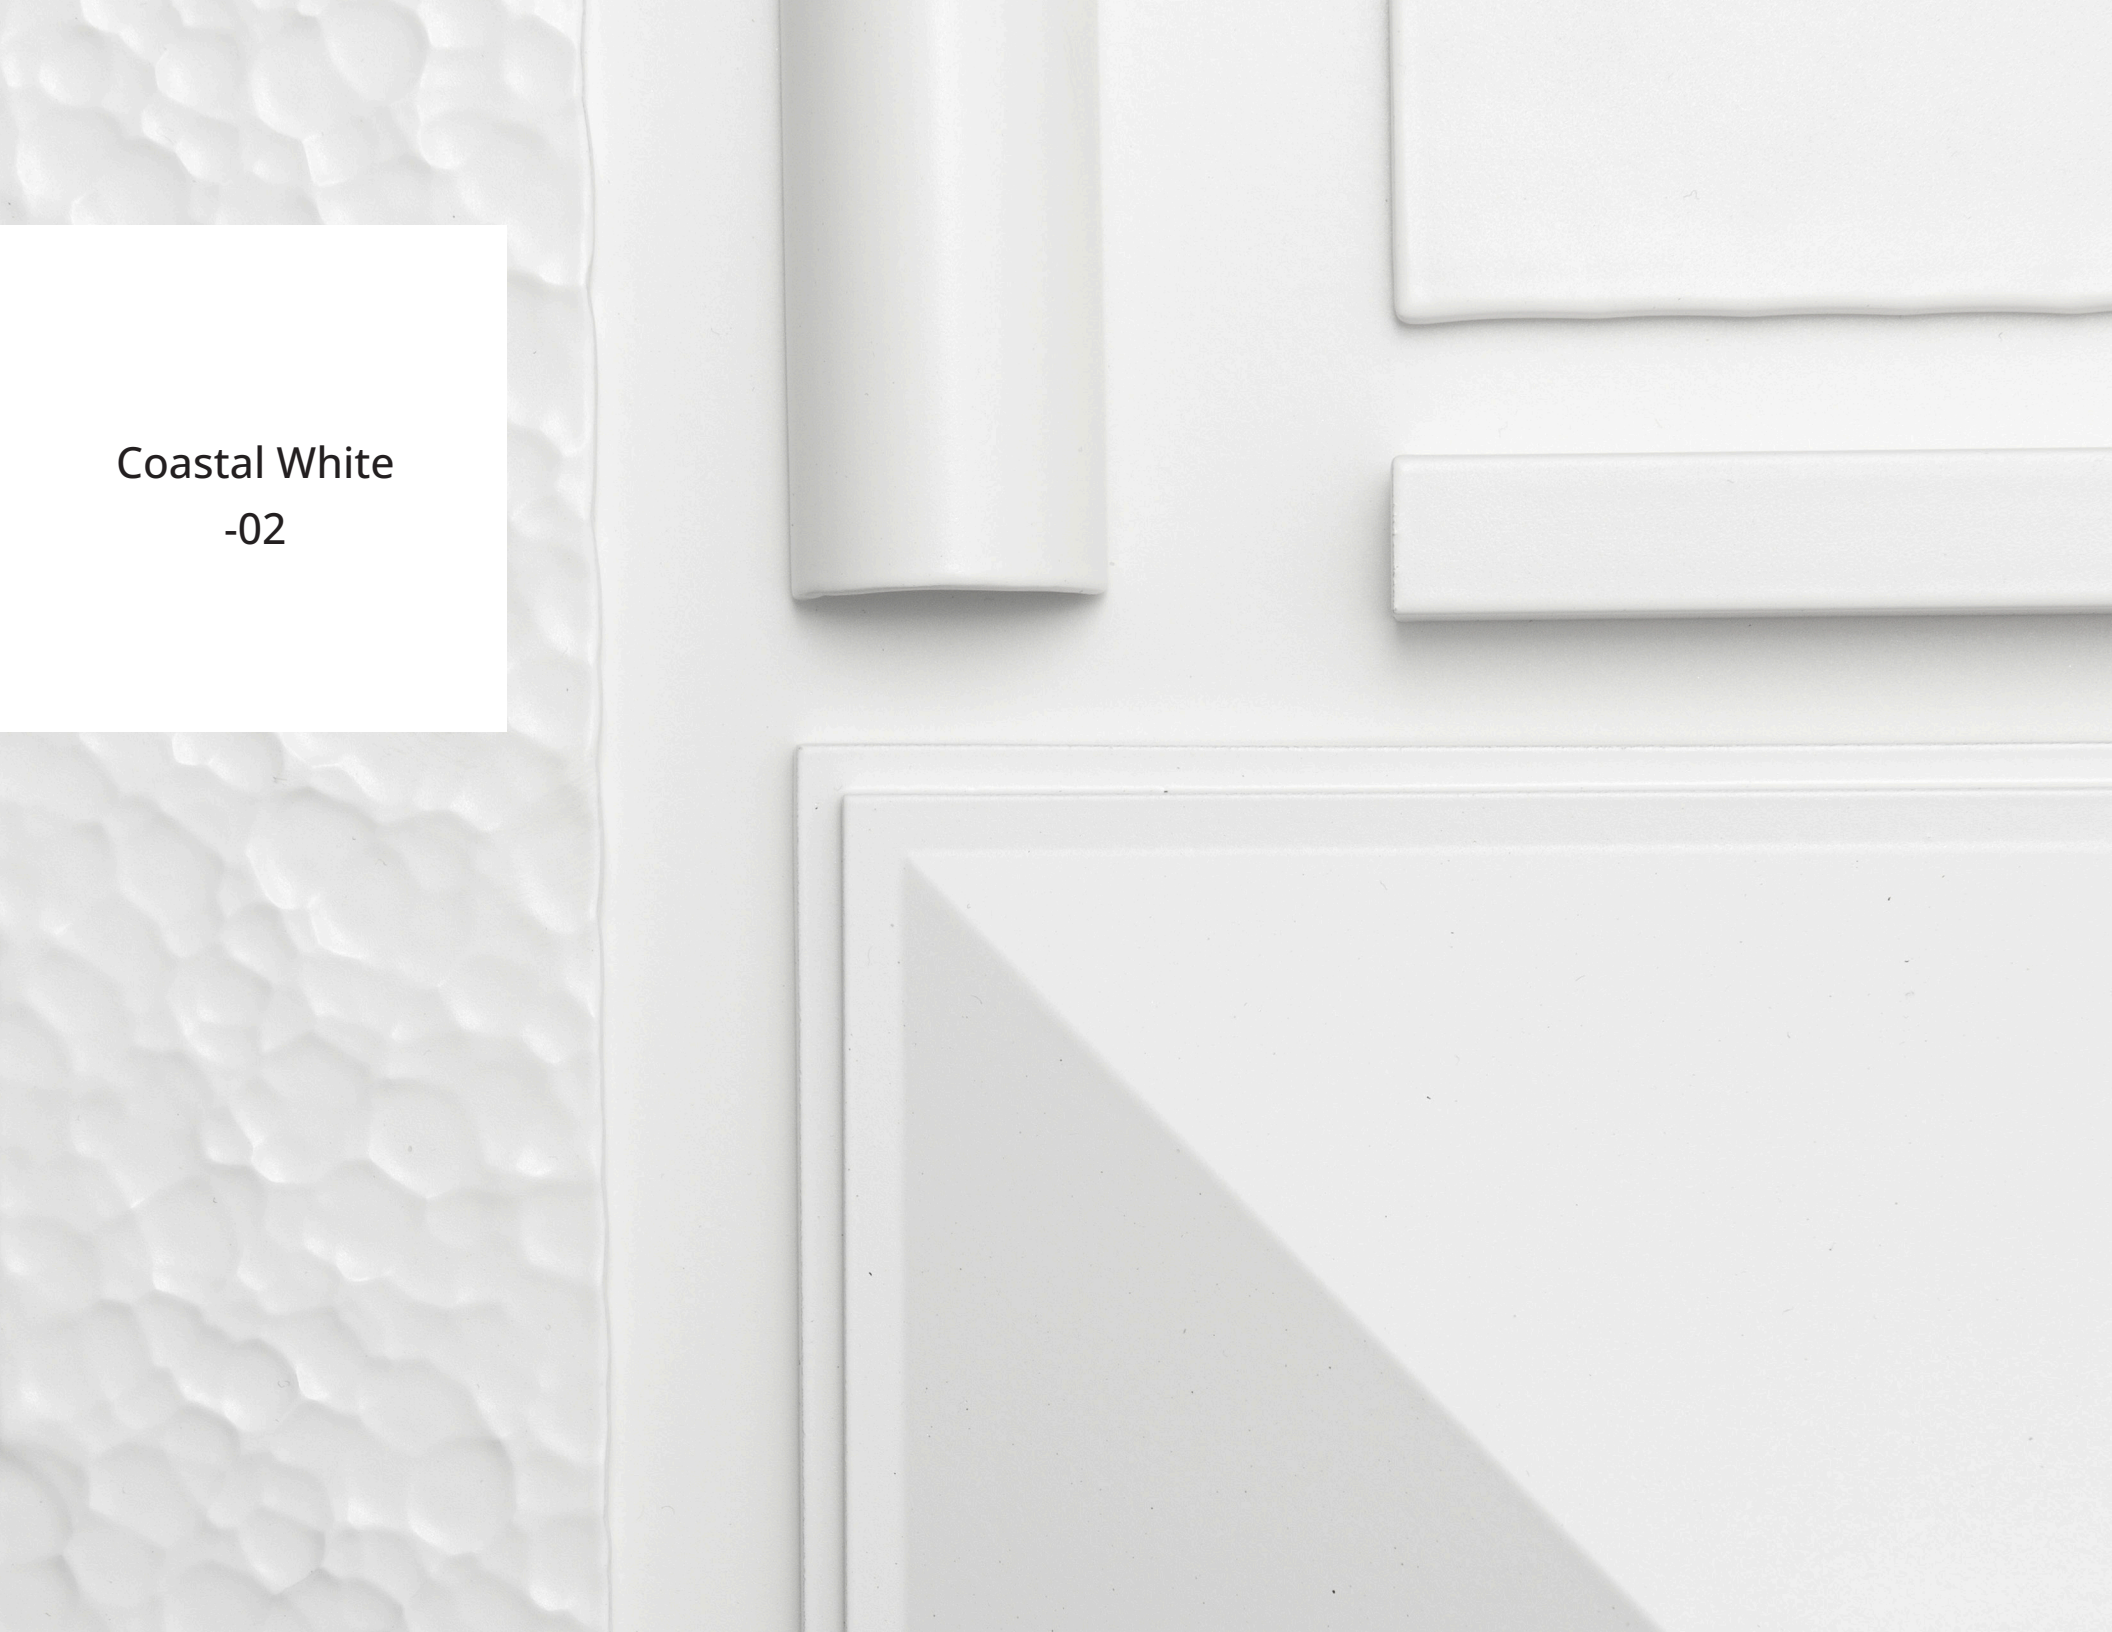

We offer a Lifetime Limited Warranty on ALL of our Coastal Outdoor Finishes, unless you are 10 miles or less from a sea coast, in which case we offer a 5-year warranty.

The image shows a close-up of a dark grey, textured surface, possibly a door or panel. On the left side, there is a vertical strip of material with a raised, pebbled texture. A white rectangular box is overlaid on this textured strip, containing the text 'Coastal Dark Smoke' and '-77'. The main surface to the right has a smooth, matte finish and features several recessed rectangular panels and a large square panel with a diagonal split in the bottom-left corner.
