LIGHTING REIMAGINED

Every day, everything we do is with the mission of giving people unique ways to see what is most important to them.

We are committed to relentlessly pursuing quality, innovation, exceptional customer service, and education. We are focused on creating on-trend designs that are both stylish and “life-stylish” to fit your needs. Whether this is growing a family or a family business, remodeling a kitchen, or providing lighting solutions for clients, we are dedicated to delivering project success and shedding light on what matters most to you.

Kichler Resource Guide Overview

PRODUCT LISTING OVERVIEW

Product Item #	44160NBRLED	Linear Chandelier	Product Description
Number of Bulbs	(2)	32W 3000K, 90 CRI, 38 LPW, 6"W x 7.25"H x 36.5"L	Fixture Dimensions
Light Source Description	Overall Ht. 46", Chain/Stem 36"		Additional Product Specs
Fixture & Light Source Features	   		

SYMBOL GUIDE

FIXTURE

-  Damp-Rated
-  Wet-Rated
-  CLIMATES™
-  Mounts Up or Down
-  Mounts Horizontal or Vertical
-  Mounts Ceiling or Wall
-  IDA Dark Sky Approved - The IDA (International Dark-Sky Association) provides objective, third-party certification for luminaires that minimize glare, reduce light trespass, and don't pollute the night sky.
-  2016 Title 24, Part 6 is a document that contains the California Building Energy Efficiency Standards for Residential and Nonresidential Buildings as regulated by the California Energy Commission. Products marked with this logo and labeled as JA8-2016 or JA8-2016-E have been found to meet the requirements stated in 2016 Title 24, Part 6. For more information, visit www.energy.ca.gov/title24.
-  ADA Compliant
-  Installation Instructions: Fixture must be supported independently of the outlet box unless the outlet box is UL Listed for the weight to be supported. Consult a qualified electrician/installer. Required installation parts included.

LIGHT SOURCE

-  Dimmable
-  Integrated LED
-  LED Energy Efficient Bulb Included
-  Energy Star
-  Fixture requires supply wire rated for at least 75° C.
-  Fixture requires supply wire rated for at least 90° C

OUTDOOR CEILING LIGHTS620

OUTDOOR ACCESSORIES626

KNOW YOUR
VISION

Just like builders make blueprints, you can make a "lighting print."

Go room by room and record your inspiration in whatever way works for you...on your phone, tablet, computer, or maybe even pencil and paper.

Consider making a vision board of what you want the lighting to look like. It's something you can refer back to as you go through the more functional process of getting it done.

LIGHTING STYLES

Understanding your style is helpful as you plan your space and select your lighting.

Do you like a more modern look with a splash of color? Or an industrial style that features more weathered woods and exposed metals? Maybe you lean more towards a traditional style with richer color tones or a vintage style that weaves in comfort and nostalgia.

By identifying your style preferences first, you'll be able to select the lighting and decor pieces that best reflect you and your aesthetic.

KEY CHARACTERISTICS

MODERN

Modern style is made up of clean lines, reflective surfaces, and neutral colors.

A style that isn't a friend of clutter, you will find this style features a softer color palette of grays and whites. This style works to create balance with minimal materials in the room. It incorporates vertical lines, natural materials, and wood furniture into its decor. And while modern style leans more monochromatic, blocks of colors and bright artwork have been known to make an appearance in this simple style.

Natural Woods

Neutral Colors

Emphasis on Horizontal & Vertical Lines

Reflective Surfaces

Pure Forms

KEY CHARACTERISTICS

INDUSTRIAL

Loved by urban dwellers, embraced by suburban neighborhoods, and right at home in a country farmhouse, anyone (anywhere) can achieve this warehouse-inspired style.

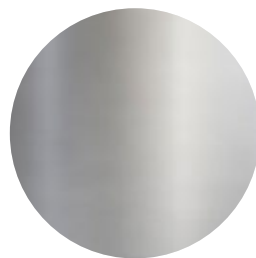

Taking cues from old factories and machinery from the turn of the century, industrial style combines utilitarian-inspired design with worn textures and refined details. It is exposed metals, leathers and weathered woods with textured, decorative pillows and throws. It mingles timeworn ruggedness with soft, smooth elements.

Reclaimed Wood

Monochromatic Colors

Polished Surfaces

Exposed Elements
brick / iron / rafters / concrete

Worn Textures

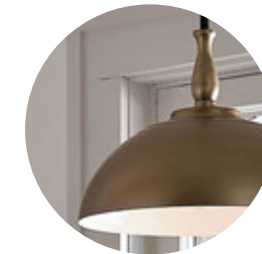

KEY CHARACTERISTICS

VINTAGE

Vintage style means incorporating furnishings, lighting, accessories or color palettes from an earlier time period.

But somehow, the vintage look has remained anything but old fashioned. Defined by a nostalgic, lived-in aesthetic, vintage style places an emphasis on character-defining elements that make a space uniquely you. Vintage style can take many forms. Mixing and matching is key to the vintage look, so you can take a little inspiration from any decade for a perfectly imperfect vintage space.

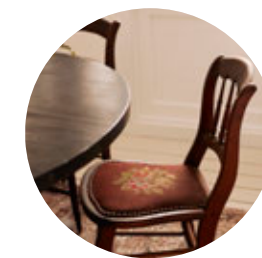

Bronze or Brass Finishes

Lace Napkins
& Tablecloths

Distressed Woods

Antique or Second-Hand
Furniture

Neutral Colors
& Pale Pastels

Floral Patterns

KEY CHARACTERISTICS

TRADITIONAL

Traditional style is just what you would expect – familiar, warm and inspired by the past.

While the specific time period varies, this style's inspiration is rooted in character and comfort. Traditional style appeals to the mainstream and is functional, but that doesn't mean the style is contained. Whether it's purely traditional or updated traditional, you can put your own twist on this classic style.

Classic Art Pieces

Dark Woods

Patterned Accent Walls

Refined Colors

Regal Furniture

Dramatic Details

LIGHTING EFFECTS

Different lighting can take a drab den and transform it into a cozy reading nook. Or, turn a somber kitchen into an energizing gathering space.

Consider what kind of mood you want to create in the room and how you intend to use your space. This will help inspire the type of lighting needed.

LIGHT LAYERING

For every space, for every mood, there's a lighting scheme that helps set the tone. Discover how different layers of light can enhance a space and set the tone for the day.

<div style="display: flex; justify-content: space-around;"> <div style="text-align: center;"> <input checked="" type="checkbox"/> ON Sconce </div> <div style="text-align: center;"> <input checked="" type="checkbox"/> ON Tape Light </div> </div> <div style="display: flex; justify-content: space-around;"> <div style="text-align: center;"> <input type="checkbox"/> OFF Downlights </div> <div style="text-align: center;"> <input type="checkbox"/> OFF Pendants </div> </div> <div style="background-color: #f0f0f0; padding: 2px; text-align: center; font-weight: bold;">AMBIENT</div> <div style="background-color: #f0f0f0; padding: 2px; text-align: center; font-weight: bold;">TASK</div> <div style="background-color: #f0f0f0; padding: 2px; text-align: center; font-weight: bold;">ACCENT</div>

Light layering can add depth and dimension to a room, switch the mood of a room instantly, and showcase your favorite things. Here are some basics to help you get started.

AMBIENT LIGHTING

Create the foundation for illumination that every room needs.

Ambient light is the main light source in a room. It provides a consistent level of light that is soft and diffused. This type of lighting comes from primary lighting fixtures such as a chandelier, pendant, ceiling fan, flush mount, or semi-flush.

Ambient lighting is ideal for living rooms, hallways, kitchens, offices, and bedrooms. This type of lighting can be dimmed down for the evening hours or turned up to full brightness during the day.

TASK LIGHTING

Deliver light in a concentrated form where it is needed most.

Task lighting is the light you need to get the daily to-do list done. This layer of lighting is concentrated where routine tasks get accomplished, like homework, cooking, putting on your makeup, brushing your teeth, etc. That's why task lighting is often under or over cabinets and around mirrors.

Also, you can strategically place downlights and recessed lighting above countertops, slightly away from the cabinets to help shed light on high-task areas.

ACCENT LIGHTING

Like jewelry, it adds the finishing touch. And a bit of wow.

Accent lighting is where it gets fun because it's all about casting a glow on your favorite things. Accent lighting is decorative lighting – including fixtures that make a design statement and those that complement a room, furnishings and things like sculptures, plants, books... whatever it is in your home you want to illuminate.

Accent lighting can be a sconce on the wall or a light inside a shelf that makes a great room glimmer...the possibilities are infinite, and there is no wrong way to do it.

Play with the different layers of light to see how you can transform your space on [Kichler.com](https://www.kichler.com)

KNOW YOUR SPACE

Different spaces have different lighting needs and requirements.

To select the right light fixture for your area, you'll first need to know the height and width of your room, the ceiling height, and the fixture's placement. This section will go through some space considerations to help you get started.

SPACE CONSIDERATIONS

To ensure you have enough lighting for your space, you will want to consider the following items: room size, placement, and ceiling height.

The combination of these three elements will give you a guideline for how many lumens you need in a room and help you determine the number of fixtures and the placement within the room to achieve optimal lighting for your space.

The content in this section is intended as general guidelines and examples. Lighting requirements vary based on factors such as ceiling height, paint color and space limitations. Please consult a lighting professional to determine what is best for your needs.

ROOM SIZE Knowing the size of your room will help determine how much light (lumens) you'll need.

1 DETERMINE SQUARE FOOTAGE

Multiply the Length times the Width of the Room to get the Room Square Footage. For example, if the room is 10 feet wide and 10 feet long, the Room Square Footage will be 100 square feet.

2 DETERMINE FOOT-CANDLES

A foot-candle is how bright the light is one foot away from the source. Lighting needs vary depending on the size of the room as well as the type of room being lit. For example, a bathroom or kitchen will require more foot-candles than a living room or bedroom.

FOOT CANDLE QUICK REFERENCE GUIDE

Kitchen, General.....	30-40 foot-candles	Bedroom	10-20 foot-candles
Kitchen, Stove	70-80 foot-candles	Bathroom	70-80 foot-candles
Kitchen, Sink.....	70-80 foot-candles	Home office	60-80 foot-candles
Dining room.....	30-40 foot-candles	Dining room.....	30-40 foot-candles
Living room.....	10-20 foot-candles	Hallway.....	5-10 foot-candles

3 CALCULATE LUMENS

Lumens are the measurement of light. The higher the number of lumens, the brighter the light. To determine the needed lumens, you will need to multiply your room square footage by your room foot-candle requirement.

For example, a 100 square foot living room, which needs 10-20 foot-candles, will need 1,000-2,000 lumens. A 100 square foot dining room, which needs 30-40 foot-candles, will need 3,000-4,000 lumens.

LUMENS QUICK REFERENCE GUIDE

Kitchen, General.....	3000-4000 lumens	Bedroom	1000-2000 lumens
Kitchen, Stove	7000-8000 lumens	Bathroom	7000-8000 lumens
Kitchen, Sink.....	7000-8000 lumens	Home office	6000-8000 lumens
Dining room.....	3000-4000 lumens	Dining room.....	3000-4000 lumens
Living room.....	1000-2000 lumens	Hallway.....	500-1000 lumens

Learn more about Light Output on page 28

TIP
If your room has darker walls, you may need additional lumens for desired illumination.

CEILING HEIGHT

Your ceiling height is as important as the size of your room.

LOW CEILINGS

If you're working with a small space with a lower ceiling, a monumental chandelier probably isn't the best idea. You would want something smaller like a semi-flush or flush mount. These small but mighty fixtures deliver just as grand effects as fixtures in a much larger size.

HIGH CEILINGS

A pendant or chandelier might do if you have higher ceilings because these fixtures are larger and can be adjusted based on the room size and ceiling scale.

TIP
If your room has high ceilings, you may need additional lumens for desired illumination.

PLACEMENT

Your lighting placement is as important as the size of your room and ceiling height.

Where you would like to install your fixture also comes into play. Are you installing the fixture over a table? You'll want to make sure the light base sits 26-30 inches above the table. Or maybe you are installing a vanity light in a bathroom. If so, you'll want to make sure to install the vanity light 65-70 inches above the floor.

To ensure everything is secure, you'll also want to verify that your ceiling or wall support is strong enough to hold your fixture. For optimal installation of your light, we recommend working with a qualified professional to help you plan and install your fixture properly.

KNOW YOUR
OPTIONS

There are many ways to incorporate light into every room. Understanding the types of lights, features, and bulbs will help you plan for the style of lighting you want and where.

To help you get started, here is an overview of some lighting types, features, and bulb types to help your vision come to life.

TYPES OF LIGHTING

Whether your lighting project is big or small, it's important to familiarize yourself with the types of indoor and outdoor lighting available.

INDOOR LIGHTING

Indoor lighting sets the tone for a home. It creates energy and mood - delivering just the right amount of light where you need it the most.

CHANDELIER

From round to rectangular, chandeliers are designed to stand out.

PENDANT

Paired together or solo, pendants are a shining focal point in a room.

CEILING LIGHT

Sits flush to the ceiling and is perfect for smaller rooms.

DOWNLIGHT

Installed into the ceiling and takes up very little space.

WALL SCONCE

Mounted to the wall and provides accent light to a space.

BATH & VANITY

Damp-rated, these fixtures are designed for the bath or powder room.

OUTDOOR LIGHTING

Outdoor lighting welcomes guests and provides safety around the exterior of your home.

WALL LIGHT

Illumination for entryways, walkways, garages and more.

CEILING LIGHT

Perfect for covered outdoor areas like a porch or gazebo.

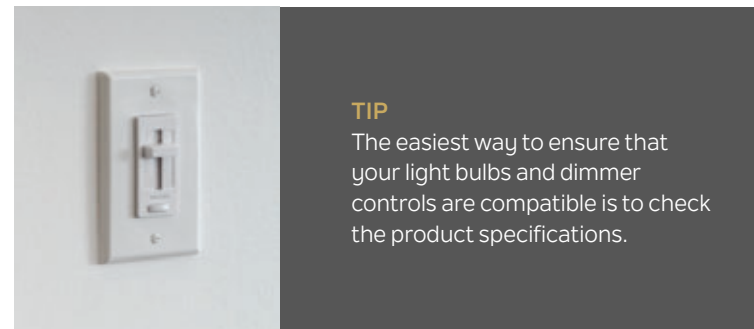

HANGING LIGHT

Delivers style and light to covered outdoor areas.

POST LIGHT

Provides light to driveways and sidewalks.

TIP
The easiest way to ensure that your light bulbs and dimmer controls are compatible is to check the product specifications.

LIGHTING FEATURES

Some of our lighting fixtures offer unique features and qualities. To help enhance your experience, we have provided additional details about these features and how these characteristics might enhance your space.

FIXTURE FEATURES

- DAMP**
A damp-rated fixture is ideal for covered places—think porches and patios—and cannot be directly exposed to water, even in a storm.
- WET**
A wet-rated fixture that can be exposed to direct precipitation.
- CLIMATES**
Utilizes a composite material with UV protectant to create an anti-fading finish resistance to acidic and alkali elements, corrosion, and rust.
- MOUNTS UP OR DOWN**
The fixture can be mounted up or down.
- MOUNTS HORIZONTAL OR VERTICAL**
The fixture can be mounted horizontally or vertically.
- MOUNTS CEILING OR WALL**
Can be mounted on the ceiling or wall.

LIGHT SOURCE FEATURES

- DIMMABLE**
Is dimmable when used with a dimmer switch (sold separately).
- INTEGRATED LED**
Incorporates LEDs directly into the fixture.
- LED BULB INCLUDED**
LED Energy Efficient Bulb is included with the fixture.
- ENERGY STAR RATED**
Use 90% less energy than traditional models using incandescent light bulbs.

BULBS

What to Know About Bulbs

Before you take a walk down the bulb aisle of a home improvement store, let us help you navigate the choices. There are common terms and descriptions for bulb shapes, base types, and light sources to help ensure you buy the right bulb for the job.

BULB TYPES

The most important part of selecting the correct type of bulb is to check your product specs first. Many fixtures require a certain wattage or only fit a certain type of bulb base, so knowing your requirements before you select a bulb will help you in the selection process.

INCANDESCENT

The light source familiar to most is incandescent. Easy to use in most homes, incandescent bulbs illuminate by electricity running through a filament. While still a very popular light source, these bulbs create more heat and use more energy than alternative light sources, like fluorescent and LED.

FLUORESCENT

The twist, spiral or ice cream cone bulb remains, but its popularity has weakened. This light source illuminates by exciting mercury vapor with an electrical charge that makes a phosphor coating inside the tube (long or twisted) glow. Fluorescent bulbs are modestly priced and use less than half the wattage of incandescent to create the same light output, but the look of the bulb and the fact that they contain mercury, has made these bulbs a less desirable option for many people.

LED

There's a lot to like about LED. As a light source it uses semiconductors (materials that conduct electricity) to produce electroluminescence. Say what? We are talking photons, atoms, and electrons here. The important part is that LED uses a lot less electricity than incandescent, up to 80% less and last a lot longer. A quality LED bulb can last up to 15 years, and that's a small investment worth making. Bulb manufacturers are also now producing most bulb shapes in LED so finding what you need or want is pretty easy.

BULB TYPE COMARISON

	INCANDESCENT	FLUORESCENT	LED
Average Lifespan	1,200 Hours	8,000 Hours	25,000 Hours
Watts Used	60W	14W	10W
No. of Bulbs Needed for 25,000 Hours of Use	21	3	1
Total Cost of Electricity used (25,000 Hours at \$0.12 per kWh)	\$180	\$42	\$30
Total Operational Cost Over 23 Years	\$201	\$48	\$38

BULB SHAPES

Changing the shape of your bulb is a simple way to alter the look of a fixture and create an entirely different style. However, it's important to note that the shape of the bulb should be determined by what fits into the fixture, and what the bulb looks like in that fixture. For example, a regular A-shaped bulb may look out of place on a candelabra chandelier.

COMMON SHAPES

A (ARBITRARY)

The bulb shape most people are familiar with

GLOBE

A sphere-shaped bulb offered in multiple base sizes depending on fixture needs.

CANDLE

Shaped like the illuminated aura around the flame when you burn a candle. This shape is also available with a twist or flourishes at the top.

PAR

Resembling a cone, these bulbs are used for directional illumination such as for track, flood or landscape lighting.

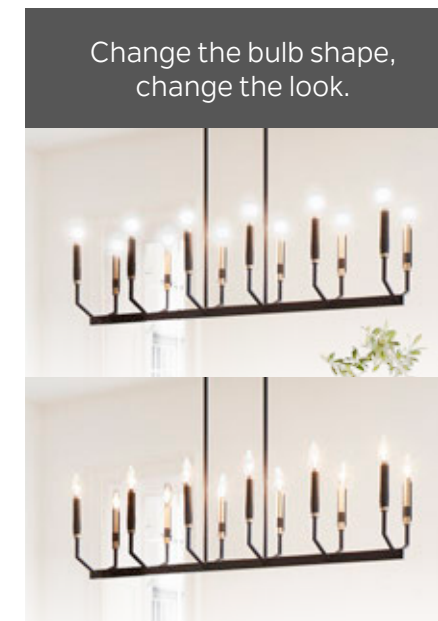

T

Tube bulbs are longer than they are wide and come in a variety of bases. T8 or T12 bulbs fall in this category and usually have a medium bi-pin base to fit into shop lights, clouds or troffer type of fixtures.

CFL, TWIST OR SPIRAL

Developed to create a shorter overall length alternative to 120V screw base incandescent.

Change the bulb shape, change the look.

BULB BASES

The bulb base you need to buy is entirely dictated by what the socket of the fixture accepts and should be noted on the fixture box or the socket.

COMMON BASES

E

E stands for Edison, and the number is the diameter of the base measured in millimeters. The base is threaded and screws into the socket.

- E12 or sometimes called chandelier, candelabra or c type
- E17 or often called appliance bulbs
- E26 or medium based, this is the most common bulb base type

G

G bulbs were initiated by the U.S. EPA and Lighting Research Center in 2004 for the introduction of CFL bulbs. The number in this

bulb description refers to the distance between the pins measured in millimeters.

There are over 75 types of G bulbs, but the GU10 and GU24 are the most common ones and are used primarily by hotels. To install you push the pins of the base into the socket and twist to lock in place.

B

B (all #'s) or bayonet bulbs are the bulb base found most commonly in the U.K. To install you push it into the socket and twist. They are

also sometimes used for automotive bulbs in the U.S. The number associated with a B bulb refers to the diameter of the base in millimeters.

We are only sharing the most popular bulb bases. Most bulb bases are named primarily with a letter followed by a number that describes a physical attribute of the bulb, and the most common ones have "nicknames" which also helps.

LIGHT OUTPUT

Think about your space. How do you visualize the lighting in the room?

Do you want a cooler color temperature or a warmer one? How bright do you want the lights to be? Understanding the color temperature and lumens will help you select the right bulbs for your light fixture and deliver the ideal color temperature and brightness you are seeking.

COLOR

COLOR CORRELATED TEMPERATURE (CCT)

Also referred to as Color Temperature and displayed as Kelvin Temperature. Kelvin Temperature (K) indicates the color of the light source or the color you are getting from an LED fixture.

2700K a warmer light—closer to incandescent

3000K trends warm, but optically closer to a pure white

4000K trends cooler, but perceived as a bright white

5000K is cool, perceived often as having a blue hue

COLOR RENDERING INDEX (CRI)

Particularly of importance indoors where there is less natural light.

CRI reflects the color that the light brings out of objects

- 90+ CRI results in a more vibrant and “true” color
- A lower CRI (<80) would make seemingly colorful objects appear subdued

LIGHT DELIVERY

DELIVERED LUMENS

Delivered lumens is the most accurate measure of how the luminaire will perform once installed. It is the actual amount of light delivered on scene, taking into account all barriers such as lenses, housing, and any filtering effects.

- **Source lumens** = the brightness at the source
- **Delivered lumens** = the brightness recognized closer to eye level, or the level in which the light has the most impact in a space

EFFICACY

LUMENS PER WATT (LPW)

LPW reflects how many lumens you get per watt—which is a sign of efficiency.

- > 50 LPW for all lamp types below 30 total listed lamp watts
- > 60 LPW for all lamp types that are < 24 inches and > 30 total listed lamp watts
- > 70 LPW for all lamp types that are > 24 inches and > 30 total listed lamp watts

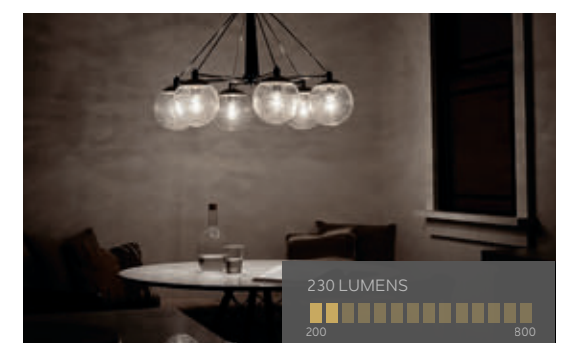

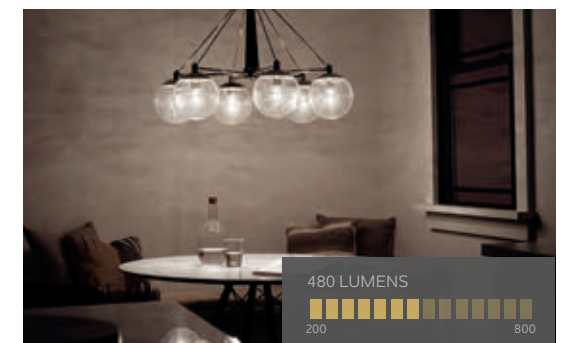

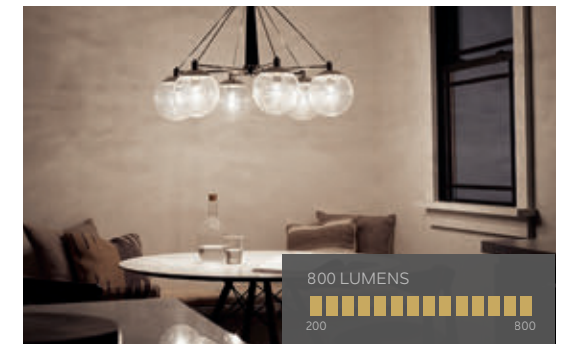

TIP
Unique materials and shapes may cast shadows and lighting patterns on the ceilings and walls.

BRIGHTNESS

LUMENS (LM)

Reflect the amount of light from a fixture. The higher the lumens, the more light you are getting.

- Lumens <550 typically work best for accent or niche lighting
- 550 to 850 lumens give light levels equivalent to traditional 40W or 60W incandescent bulbs respectively, and are ideal for downlighting
- 850 to 2000 lumens typically work best in spaces with average ceiling height (9' to 12')
- 3000 to 5000 lumens are typically best for larger spaces, vaulted ceilings, and more task driven applications that require significant light

BRING IT ALL TOGETHER

From the curb to the mudroom cubby - we offer a lighting solution for your whole home. No need to look anywhere else for your decorative, landscape, ceiling fans, or other lighting needs - we can assist you from the inside out.

Kimrose™

Inspired by the Art Deco details on Madison Belmont Building in New York City, the Kimrose collection is anything but ordinary. You may find yourself unable to look away, as you explore its bold geometric shapes, bright finishes, and ribbed glass. Each piece is a work of art, and with luxe Art Deco style trending, that's exactly what we want.

NEW

Truby™

Long arms, curved features, and a hint of the industrial make the Truby collection a contemporary design favorite. Inspired by American public works architecture of the 1920s and 30s, the collection borrows from the Streamline Moderne, Art Deco's sleeker interpretation. The result is a refined lighting collection ideal for bath, living, and kitchen spaces.

Kadas™

Art Deco glamour from the 1920s meets the softer styles of today: with the Kadas collection, it's all about the lines. Sleek and swooping lines add definition and a multi-tiered look. Enhancing the style is the finish options. Every fixture includes two interchangeable candle sleeves that allow you to easily switch the look. Choose bold black for a more dynamic retro look or polished nickel for a subtle style.

FEATURE

Curate Your Look
Black or Polished
Nickel Candle Sleeves

Emmala™

The Emmala collection is a dash of luxe glam. With stacked forms inspired by the iconic Chrysler Building, Emmala™ strongly references Art Deco. Its familiar wagon-wheel shape and inviting finishes provide a touch of familiarity. Together, Emmala brings satisfaction.

Laurent

Laurent is the kind of collection that works just about anywhere. Soft contemporary lines and bi-level candle heights define each arm, yet luxurious materials add a bit of pizzazz. Featuring optional white linen shades and a white marble center column, the Laurent collection delivers a soft modern touch to a classic design.

Trentino

Mid-century modern design is simple, sleek, and alive in the Trentino™ collection. Each fixture is like an uncluttered and clean sculpture. Each light gives you just what you need. And each design adds character to whatever room it's in. This is the Trentino way.

Pim™

Children of the 1960s and 70s remember the look: milky white glass jars patterned with interest. With Pim fixtures, we combine this nostalgic material with modern-day touches: soft and rounded shapes, luxe finishes, and simple lines.

Armand™

The Armand collection is inspired by the beautiful and elegant design of the iron gates that adorn London, England's Natural History Museum. This collection incorporates mixed finishes with faux leather accents wrapped around candelabras. A statement collection that can easily adapt to many styles and décor.

"These were very easy to install than we thought it would be though we had a few learning bumps along the way... This fixture is wonderful. We were hoping for something that looked nice and would also go well with our eclectic furnishings. This fixture provides plenty of light without it being way too bright."

★★★★★
"I am in love with my new light fixture...It lights up not just my dining room but also my living room...unlike my old dome light fixture. The brightness is absolutely incredible! It also comes with three separate extensions...The install was extremely easy as well it took my boyfriend about 10 minutes to put together and install it. I'm so happy with this chandelier and highly recommend it!!"

★★★★★

"The quality of the Kichler Aubrey 5 Light Chandelier in Olde Bronze was obvious as soon as I opened the box. The construction is solid and seamless, with rich details like frosted glass globes. Assembly is simple, and I am thrilled with the result—a versatile, classic design....Highly recommended!"

Lente™

The Lente collection was inspired by the steel cables on contemporary railings in modern industrial architecture. The collection features clean lines and mixed finishes of minimalism. The use of wood, dark in tone, adds a touch of warmth to the mix of metals. This is not your ordinary, run-of-the-mill lighting. It makes a statement.

Aivian™

The Aivian collection proves that refined does not mean boring. This collection's signature arms and details exude confidence. Limiting Aivian to one style is a mistake — its classic feel adds sophistication to rustic or vintage spaces, and its attitude adds an edge to simple, modern spaces. You get to decide.

Eastmont™

The Eastmont collection transforms a classic into distinctive. Unmistakably sophisticated, undeniably alluring, Eastmont blurs the lines between luxury and rustic, industrial and vintage. How it shows up is entirely up to you.

Everett™

The Everett collection is a delicious paradox, maintaining its edginess while enjoying the luxurious. Intricate metalwork blends curved and straight lines that pour into mini glass pendants. With a delicate floating disc motif that complements the collection's utilitarian design, Everett is a recipe for a versatile, dynamic, and timeless look.

Alexia

Sometimes a little fun is called for in-home design: with the Alexia Collection, we've given a lively update to the classic chandelier. There's a sparkle of the unexpected, with mixed finishes and textures that tie the look together. The mixed-media approach makes the Alexia pieces the perfect addition to modern spaces, offering a bit of a glam-inspired style.

Darton™

We love it when a simple style makes such a striking statement. Inspired by hanging glass terrariums, Darton fixtures, clean lines and pure, clear glass let the light shine through, while tapered lines and on-trend finishes add the "wow" factor. It's a great updated traditional style that works in both modern and traditional settings.

Capitol Hill

Pure simplicity makes a big statement with the Capitol Hill collection. Inspired by Tate Gallery in London, each piece delivers a timeless unassuming basket-inspired style and unexpected lines: thin arms swoop at subtle angles while subtle tiered details enhance the look. With its updated traditional style and several platform choices, the collection provides ample light from entryway to hallway to living areas.

FEATURE
Two sets of candle sleeves included. One to match the body finish and one contrasting set.

Cassadee

Inspired by 18th-century calligraphy, Cassadee creates the feeling of fluid movement within a beautiful stationary piece. The metalwork appears thick from the front and thin from the side, creating an on-trend, open-cage design. The simple style works well in updated traditional spaces.

Cassadee

Kennewick™

Sprinkling nostalgia into the present day is what the Kennewick collection is all about. It features classic silhouettes, clean curves, and candelabra light bulbs for a sophistication all its own. A little modern, a little traditional, the Kennewick collection's sophistication is found in its simplicity.

Elias

The Elias collection features a pan-inspired look that's full of variety. Perfectly suited to mid-century, industrial, or minimal décor, each pendant is convertible to semi-flush. The contrasting gold metallic interior softens the light while providing a beautiful illuminating effect.

Tollis™

Fresh and stylish, the Tollis Collection is designed with a high gloss dome, clear ribbed glass, and dual finish to help set the tone for a relaxing atmosphere. The Tollis collection mixes nicely with minimalistic nautical décor.

Vath™

The Vath Collection features a decorative frame with curved detail and mixed finishes – adding dimension and visual appeal to any setting.

16"L with cord+box
W T24 LED

INSTALL TIP

Tight fit behind your ceiling? Air ducts in your way of installing a light where you need it? Not anymore with our DtC Slim Downlight.

No need for a Can or Junction box, just cut your installation hole and let the spring clips do the work to snap the fixture in place.

LED Direct-to-Ceiling (DtC) – Recessed & Gimbal

Brianne

To experience the Brianne™ collection is to experience the best of two worlds — a retro lighting collection that's both luxurious and fun. Embracing the funky starbursts of mid-century design, Brianne™ rejuvenates as it illuminates.

Pim™

Finish: Polished Nickel | Glass: Satin Etched Cased Opal

Pim™

Children of the 1960s and 70s remember the look: milky white glass jars patterned with interest. With Pim fixtures, we combine this nostalgic material with modern-day touches: soft and rounded shapes, luxe finishes and simple lines.

COORDINATING

52223PN

Truby

Long arms, curved features, and a hint of the industrial make the Truby™ collection a contemporary design favorite. Inspired by American public works architecture of the 1920s and 30s, the collection borrows from the Streamline Moderne, Art Deco's sleeker interpretation. The result is a refined lighting collection ideal for bath, living, and kitchen spaces.

Ciona

The Ciona™ collection resurrects an older lighting style and refines it in true Art Deco style. Inspired by the architecture of ancient Egypt, Ciona™ is majestic yet clean. It is lighting that's unapologetically simple and unabashedly radiant.

Vionnet™

A soft contemporary style with pick-your-own flexibility! Vionnet offers two looks that you can take in different directions: choose Brushed Nickel with Satin Etched glass shades for a more traditional look or Black with Clear glass for a more modern style. The Black option also comes with two light socket finish choices for even more versatility!

FEATURES

Includes Polished Nickel and Classic Bronze Socket Covers

Giarosa

The Giarosa™ collection takes your breath away. Inspired by candlesticks in a tall hurricane glass, its double glass layers distinguish it from other lighting fixtures. When paired with different visual home décor elements, its simple contemporary design blends beautifully with a soft contemporary, modern contemporary or Art Deco design style. It's simply like no other.

Giarosa

Finish: Chrome | Glass: Clear Spun Outer with Opal Inner

Cosabella

The Cosabella™ collection is luxurious, soft, and sophisticated. The collection's cinched stem is reminiscent of a classic Mid-Century era silhouette, and the Satin Etched Case Opal creates a calm and gentle glow. Influenced by the Danish clean and minimal approach, delicate curves and basic finishes make Cosabella™ the crown jewel of your stunning space.

Everett™

The Everett™ collection is a delicious paradox, maintaining its edginess while enjoying the luxurious. Intricate metal work blends curved and straight lines that pour into mini glass pendants. With a delicate floating disc motif that complements the collection's utilitarian design, Everett™ is a recipe for a versatile, dynamic, and timeless look.

Harvan™

The Harvan™ collection was designed for those with an edge. Inspired by the cleaned-up industrial trend, this collection features polished metals mixed with utilitarian motifs and hardware. The curved glass shades feature a ribbing that makes you look twice. Harvan™ is edgy. And it's refined.

Meller™

The Meller™ collection evokes images of wrought iron fence gates. During the Industrial Revolution, people installed the gates to protect their side yards while still allowing light to come through for growing plants. With its strong finishes and curved, clear glass, the Meller™ collection brings home an evolved industrial style, one that's slightly more polished, minimal, and un-cluttered. Like the days of old, it brings home light.

Moorgate

Chunky knit blankets, weathered woods, and neutral colors. These are the comforts of vintage farmhouse décor. The Moorgate™ collection completes your home with a clean approach to the traditional, oversized X pattern. Whether in your kitchen, entryway or bathroom, these lights awaken your style and invigorate your space.

OUTDOOR LIGHTING

Elias LED

The Elias collection features a pan-inspired style that's full of variety. Perfectly suited to mid-century modern or contemporary home exteriors, the pendants are fully convertible to semi-flush installation. The contrasting gold metallic interior softens the light while providing a beautiful illuminating effect.

Goson

The Goson™ collection refines industrial-style lighting. Goson is clean, clear, and uncluttered. Inspired by the leaded glass windows found in old factory architecture, this collection honors simplicity. It finds beauty in clarity and purpose in light.

Mercer

Inspired by residential architecture where bold, simple forms are used to help delineate areas of the home. The center seeded glass shade seems to give the illusion that it is floating within the strong, rectangular frame. The Mercer™ Outdoor Collection delivers a stunning, decorative wall sculpture to the home, day or night.

Drega

The Drega collection is uncomplicated and elegant. Soothing, serene, and timeless. Inspired by a pillar candle within a leaded glass terrarium, Drega blends modest forms to create an open, clean minimalistic light.

NEW

Astalis

Inspired by selenite crystals that emerge from cave walls, the Astalis collection lights with the unexpected. And delightfully so. This collection harmonizes unique shapes and timeless finishes in a modern minimalist fashion. Bold, daring, sophisticated. That's Astalis.

"I love this lantern, it is so stylish and looks great by my front door. It was packaged very well and arrived it perfect shape. I really like the design of this lantern. The hammered glass looks great on this piece. The lamp gives off the perfect amount of light. The installation instructions were easy to understand. I would recommend this light to anyone thats considering it. It really is a nice lantern."

Timmin™

The Timmin™ collection lights your home's exterior in timeless style. Mixing classic and modern elements, the collection exudes a quiet sophistication. Its curved shape comes from contemporary bureaus, and its glass is seeded, lighting your home in soft elegance.

Barras™

The Barras™ outdoor wall light offers a classic look with a vintage feel. Inspired by the early electric era style, it is the perfect addition in several aesthetic outdoor environments, including traditional and transitional.

Barras™

Finish: Black | Glass: Clear Ribbed

Carlson

From walls to posts, Carlson brings early American style to a home's exterior spaces. The simple and traditional lines freshen up the classic lantern style, while the arched handle softens the look. Seeded glass gently filters the light.

FIXTURE

	Damp
	Wet
	CLIMATES™
	Mounts Up or Down
	Mounts Horizontal or Vertical
	Mounts Ceiling or Wall
	IDA Dark Sky Approved
	2019 Title 24, Part 6 is a document that contains the California Building Energy Efficiency Standards for Residential and Nonresidential Buildings as regulated by the California Energy Commission. Products marked with this logo and labeled as JA8-2019 or JA8-2019-E have been found to meet the requirements stated in 2019 Title 24, Part 6. For more information, visit www.energy.ca.gov/title24 .
	ADA Compliant
	Installation Instructions: Fixture must be supported independently of the outlet box unless the outlet box is UL Listed for the weight to be supported. Consult a qualified electrician/installer. Required installation parts included.

LIGHT SOURCE

	Dimmable
	Integrated LED
	LED Energy Efficient Bulb Included. Option to purchase specific fixtures that come packaged with compatible LED bulbs
	Energy Star
	Fixture requires supply wire rated for at least 75° C
	Fixture requires supply wire rated for at least 90° C

- Bulbs not included unless otherwise noted.
- Wattages stated are the maximum allowed; however, you may use lower wattage lamps to suit your lighting needs. Some recommended lamps are not available in the maximum allowable wattage.
- All electrical products are rated as 120-volt, AC unless otherwise noted.
- All electrical products are certified and listed to UL/CSA Standards for use in U.S.A. and Canada except where noted.

- All chain drop products equipped with at least 72" of chain unless otherwise noted.
- All products featured in the outdoor section are certified and listed to UL/CSA standards for wet location except where noted.
- Many long-life tungsten halogen capsule lamps are now available as alternates to conventional incandescent light bulbs. The halogen capsule lamps may be used to replace any lamp of a higher wattage, but not to exceed the existing specified maximum wattage, i.e., 72W may replace a 75W.

- On some products, in order to accommodate higher-than-normal ceiling height, extra lead wire is supplied and specified. With additional sections of chain or stems (not included), this allows an added measure of design flexibility.
- Finishes for fixtures installed outdoors are subject to change due to prolonged exposure to sunlight, airborne pollutants, and other forms of weathering.
- To serve you better, Kichler Lighting reserves the right to make improvements to the products in this catalog. Therefore, some products may change during the life of the catalog and the product information contained in this catalog may also have changed.

Consumer Notice

Federal Legislation to phase out 100 watt Incandescent Bulbs started January 2012

The federal government enacted the Energy Independence and Security Act of 2007 in December 2007, requiring all general-purpose light bulbs that produce 310-2600 lumens of light be 30% more energy efficient (similar to current halogen lamps) than current incandescent bulbs by 2014. The efficiency standards started with 100 watt bulbs in January 2012 and will end with 40 watt bulbs in January 2014.

Light bulbs outside of this range are exempt from the restrictions (historically, less than 40 watts or more than 150 watts). Also exempt are several classes of specialty lights, including appliance lamps, rough service bulbs, 3-way, colored lamps and plant lights.

By 2020, a second tier of restrictions will become effective; which requires all general-purpose bulbs to produce at least 45 lumens per watt (similar to current CFLs). Exempt from the Act are reflector flood, 3-way, candelabra, colored and other specialty bulbs.

Many governments worldwide have passed measures to prohibit the sale of incandescent light bulbs for general lighting. The aim is to encourage use of more energy-efficient lighting alternatives, such as LED lamps.

We go to great lengths to assure the metal and glass finishes shown in the catalog match the actual products, but printing variations and variations in chemical finishes and the nature of hand-applied finishing will cause some differences between the printed images and actual product, and from one product to another.

We use only non-ferrous materials on the exterior parts of our outdoor lantern products, and use the best available weather-resistant finishes. However, due to some extreme environmental conditions such as acid rain, salt air and ultraviolet exposure, we cannot guarantee our exterior finishes, with the exception of our LifeBrite® lanterns.

Due to environmental conditions such as soil acidity, concrete alkalinity and other corrosive soil and air conditions, we cannot guarantee our direct burial posts.

All electrical products are UL/CSA/ or ETL Listed and Certified to UL/CSA Standards for use in U.S.A. and Canada except where noted.

The IDA (International Dark-Sky Association) Fixture Seal of Approval provides objective, third-party certification for luminaires that minimize glare, reduce light trespass, and don't pollute the night sky.

Kichler Lighting is a member of the American Lighting Association (ALA), a trade association

representing the residential lighting and ceiling fan industries in the United States and Canada. Its membership includes leading lighting and fan manufacturers, showrooms (retailers), manufacturers representatives and designers. ALA members are dedicated to providing the public with the proper application of quality residential lighting.

To serve you better, Kichler Lighting reserves the right to make improvements to products in this catalog. Therefore, some products may change during the life of the catalog and the product information contained in this catalog may also have changed.
