

SECURE & CONVENIENT

ACCESS CONTROL MADE SIMPLE

Designed for multi-family residential projects, Enkore is a Wi-Fi-connected access control system that's easy to install and intuitive to use.

SIMPLER AT EVERY STEP

Why Choose **Enkore**

Wireless Convenience

Locks and readers connect simply and securely to the network via Wi-Fi.

Centralized Tools

Grant and audit access remotely. Run and manage everything from a single PC.

Dedicated Support Team

Rely on our team of experts for setup, training, and ongoing support.

Deadbolt

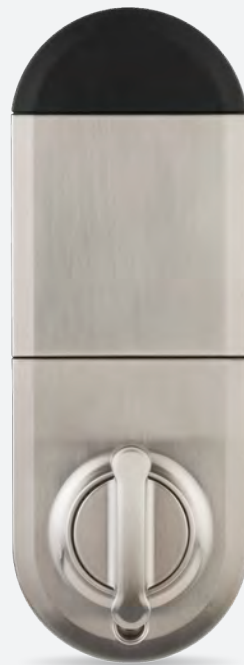

Programmable deadbolt lock for resident or tenant entry.

FINISH

US15-619 Satin Nickel

WALL READERS

AMENITY ACCESS

Ideal for common area access such as club houses, pool gates, fitness rooms, and other shared facilities. Enkore wall readers connect to the local network via Wi-Fi. Weather-resistant design for indoor or outdoor use. Available in Satin Nickel.

Secure

High-security authentication with 128-bit AES encryption.

Weather Resistant

All Enkore hardware is certified weather resistant for exterior use.

Flexible Control

Programmable time control. Grant or limit access by user, location, or time.

Tamper Proof

Get real-time alerts when the lock is tampered with. Audit access times, locations, and credentials.

System Features

- Retain a log of all lock events, each with its own date and time stamp
- Restrict or grant access to certain locks and users by time and day
- Auditory and software alerts when key cover is being tampered with
- Programm all locks via Wi-Fi using Enkore's robust management software
- Receive live alerts via e-mail for specified events
- Allow unrestricted access with Passage Mode
- Temporarily restrict all access with Privacy Mode
- Visual and auditory low battery alerts
