

TECHNICAL DATA SHEET

608 SERIES - Heavy Duty Push Plate Activation Switch Bollards

608-RP-NT-BR-SM
with 49-H-NY installed

608-RP-NT-GR-SM

608-RP-NT-BR-SM

DESCRIPTION

Built with heavy gauge tubular steel, aircraft quality fasteners and durable powder coat finishes, the **608 Series** bollards withstand all weather conditions while providing an attractive solution for standalone activation to any automatic door.

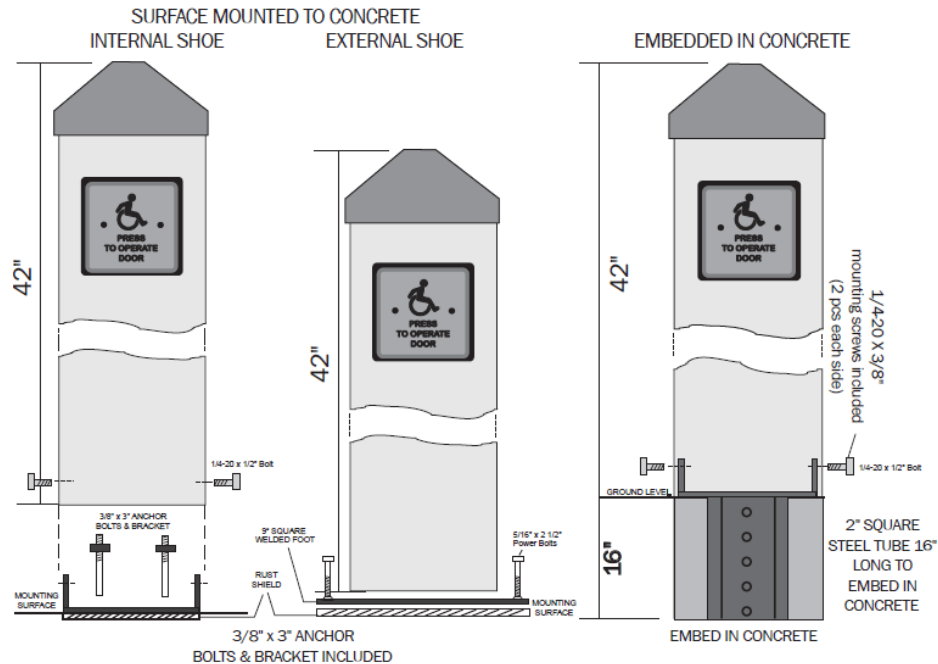

FEATURES

- 5" square tubular steel with 1/8" thick walls
- Gray or dark bronze exterior powder coat finish
- 3 options available: blank, surface mount switch prep or recess mount switch prep
- 59 Series switches (sold separately) seamlessly mount in bollard
- Interchangeable surface or in-ground mounting shoes
- Formed industrial grade plastic cap with integrated transmitter (order separately) provides reliable wireless activation
- Innovative rust shield (included) protects base of bollard
- Custom colors and machining available
