ACTIVAR CONSTRUCTION PRODUCTS GROUP INC.

OUR BRANDS

Activar Construction Products Group develops and manufactures innovative products under the trusted brands JL Industries, Cato, Dur-Red, and Air Louvers. Headquartered in Bloomington, Minnesota, we operate multiple manufacturing facilities and strategically located warehouses for efficient distribution and fast delivery to major metropolitan areas throughout the United States.

JL INDUSTRIES

The legacy brand of JL Industries began with fire extinguishers and cabinets and has grown to include access panels, roof accessories, emergency specialties, corner guards, floor doors and entrance floor systems. Through our vast variety of options, our line of products meets the needs for small and large projects. Our knowledgeable sales representatives work closely with our nationwide distribution partners to support your goals from start to finish.

Ambassador
1017F10

CATO

CATO specializes in manufacturing a complete line of durable plastic fire extinguisher cabinets and protective covers for fire alarms that are made in the U.S.A. From surface-mount to semi-recessed cabinets, we accommodate most 5, 10, or 20 lb. fire extinguishers. Whether corrosion is a concern or an MRI-safe cabinet is required, our non-rusting models are the clear choice.

STOCKING WAREHOUSES

We offer 1-5 day shipping on our most popular products from our manufacturing and warehouse locations in the U.S. Find the most current stock list and other product information on our website at activarcpg.com.

Manufacturing: Minneapolis, MN | Los Angeles, CA
Warehouses: Fort Myers, FL | Atlanta, GA | Chicago, IL | Fargo, ND | Omaha, NE | Lancaster, PA | Salt Lake City, UT | Dallas, TX | Seattle, WA

WARRANTY

All fire protection products carry a one-year warranty after the date of shipment against defects in materials and workmanship. We will replace or repair any product found defective within this period at our discretion. No other warranty express or implied is valid. Fire extinguishers may carry a longer warranty.

AMERICANS WITH DISABILITIES ACT (ADA) GUIDELINES

PROJECTION REQUIREMENTS

The federal regulations for ADA Standards for protruding objects such as fire extinguisher cabinets, specify that “objects projecting from walls with their leading edges between 27” and 80” above the finished floor (AFF) shall protrude no more than 4” into walkways."

Look for Model Numbers in Blue to find cabinets that meet the ADA 4" Projection Requirement.

ABOUT JL INDUSTRIES FIRE-FX2® FIRE-RATED CABINETS

JL Industries led the industry by introducing the first pre-lined Fire-Rated Cabinets in 1991. Those cabinets have changed and simplified the installation process forever. In 2015, JL took the next step and eliminated the heavy gypsum wallboard to line cabinets, by replacing it with lightweight, mineral wool insulation.

UL classified and labeled up to 2 hours in accordance with UL 1479 (ASTM-E814) and CAN/USC-S115

This view is for metal or wood framing installation

It is the responsibility of the customer to communicate specifications and product performance requirements that are needed for their application. This document is intended to convey potential product configurations and offerings. It is not to be used to imply or represent a specification or rating, of finished products shipped. Detailed, specific submittals can be created upon request. It is the responsibility of the customer to specify product accordingly to comply with local laws, codes, and ordinances.

COSMIC EXTINGUISHERS: MULTI-PURPOSE DRY CHEMICAL — CLASS A,B,C FIRES

These units contain specially fluidized and siliconized mono ammonium phosphate powder, which smothers and breaks the chain reaction on Class B fires, fuses and insulates Class A fires and is a non-conductor of electricity. Non-toxic.

Operation: Squeeze the lever, which opens the valve, allowing the chemical to be forced out. Upright squeeze grip operation approved to -65°F (-52°C)

Construction: Heavy-duty steel cylinder with rugged metal valve and siphon tube, replaceable molded valve stem seal, visual pressure gauge, pull pin and upright squeeze grip. Corrosion and impact-resistant powder coat finish

GALAXY EXTINGUISHERS: REGULAR DRY CHEMICAL — CLASS B,C FIRES

These models contain a siliconized sodium bicarbonate base, the traditional dry chemical. Cleanup after use is generally easy, because the chemical does not normally bake to a hot metal surface. Non-toxic.

Operation: Squeeze the lever, which opens the valve, allowing the chemical to be forced out. Upright squeeze grip operation approved to -65°F (-52°C)

Construction: Heavy-duty steel cylinder with rugged metal valve and siphon tube with replaceable valve stem seal, visual pressure gauge pull pin and upright squeeze grip

SATURN EXTINGUISHERS: CLASS A:K WET CHEMICAL — CLASS A, K FIRES

A low "pH" potassium acetate solution is discharged in a fine mist that provides excellent range while preventing splashing and creating an effective saponification foam-type blanket necessary for suppressing liquid cooking media fires.

Operation: Squeeze the lever, which opens the valve, allowing the chemical to be forced out

Construction: Stainless steel cylinder with protective nozzle tip orifice seal and non-metallic nozzle tip finger guard. Industry standard horn and nozzle design. Name plate shows only the class "K" symbol

MERCURY EXTINGUISHERS: HALOTRON® — CLASS A,B,C FIRES

Contains the clean extinguishing agent Halotron® 1, which is EPA-approved, government-accepted and specified. This agent discharges as a liquid, then quickly evaporates, leaving no residue to clean up afterwards. Electrically non-conductive.

Operation: Squeeze the lever, which opens the valve, allowing the chemical to be forced out. Temperature range from -40°F to +120°F

Construction: Drawn steel cylinder with steel siphon tubes, power cone discharge stream, upright squeeze grip visual pressure gauge and corrosion-resistant paint finish

SENTINEL EXTINGUISHERS: CARBON DIOXIDE — CLASS B,C FIRES

This extinguisher contains liquid carbon dioxide under pressure. Electrically non-conductive.

Operation: Squeeze the lever, which opens the valve, allowing the carbon dioxide to be forced out. The discharge, which changes into a gas and appears as a smothering cloud of white snow, is then directed to the fire through a funnel-shaped horn

Construction: Lightweight, high-pressure, aluminum cylinder with O-ring seal and straight thread all-metal valve fits all sizes. The Sentinel is absolutely rust-free and up to 30% lighter than CO_2 units with steel cylinders

© 2026 ACTIVAR CONSTRUCTION PRODUCTS GROUP, INC.

NEBULA EXTINGUISHERS: WATER MIST FOR ELECTRICAL — CLASS A,C FIRES

This non-toxic water mist extinguisher is ideal for Class A fires and where a potential Class C (electrical) hazard exists. Units shipped empty.

Operation: The unique misting nozzle provides safety from electrical shock, making this extinguisher ideal for use in telecommunications and cleanroom environments

Construction: Non-magnetic cylinder and misting nozzle. For use in medical facilities

GRENADIER EXTINGUISHERS: PRESSURIZED WATER — CLASS A FIRES

The "water press" extinguisher contains water and compressed air. Units shipped empty.

Operation: Squeeze the lever, which opens the valve, allowing the water to be forced out. Upright squeeze grip

Construction: Butt-welded 304-L stainless steel cylinder. Heavy-duty, brass, chrome-plated valve body with replaceable molded valve stem seal

*Indicates mounting bracket standard. J Hook wall bracket standard with all other extinguishers.
NOTE: JL Extinguishers are shipped fully charged with the exception of the Nebula & Grenadier. NFPA regulations also require extinguishers to be inspected when initially placed in service and all local fire code and all local fire code and tagging requirements must be adhered to. All fire extinguisher sizes are nominal. Contact customer service for more information about ordering tagged extinguishers in your area.

PURPLE K EXTINGUISHERS: CLASS BC DRY CHEMICAL FIRE EXTINGUISHER

High performance extinguishing agent most effective for dealing with flammable liquid fires.

Operation: Squeeze the lever, which opens the valve, allowing the chemical to be forced out. Upright squeeze grip operation. Temperature range -65°F (-52°C) to 120°F (49°C)

Construction: Heavy-duty steel cylinder with rugged metal valve and siphon tube with replaceable molded valve stem seal, visual pressure gauge, pull pin and upright squeeze grip. Corrosion and impact-resistant powder coat finish

ORBIT LOW PROFILE EXTINGUISHERS: MULTI-PURPOSE ABC OR PURPLE K

Available for wall mount in both Multi-Purpose ABC or Purple K (FE10VB & FPK10VB) or available in cabinet mount version with Multi-Purpose ABC (FE10V). See JL's low profile 2100 series cabinet on pg. 11.

Operation: Squeeze the lever, which opens the valve, allowing the chemical to be forced out. Temperature range from -40°F to +120°F

Construction: Corrosion resistant, powder coated, tempered aluminum vessel with aluminum valve and siphon tube. Visual pressure gauge, stainless steel pull pin, handles, bracket and button hook

WHEELED EXTINGUISHERS: MULTI-PURPOSE AND REGULAR DRY CHEMICAL

Available in three size capacities with two choices of extinguishing agent and three different operational design configurations, the best match for your hazard protection needs can be accurately selected, maximizing the fire safety of your operation. Easily transportable through doorways and over rough terrain.

Typical Uses: Offshore rigs, ship docks, refineries, chemical plants, aircraft ramps, processing plants, storage and loading areas

Construction: Cylinders with chrome-plated brass valve assemblies manufactured to DOT specification 4BW240. Highly visible pressure-indicating gauge. Cylinders and carriages are shot blasted, primed and coated with powder coat finish that exceeds Underwriter's Laboratories 240 hour salt spray requirements. All units are equipped with all weather semi-pneumatic 12.3 inch diameter, 3.5 inch wide tires that allows for easy movability through narrow doors and walkways by a single operator. Built to ANSI/UL 299 and 711 standards

Other Extinguishant Types: Carbon Dioxide and Halotron™ wheeled units also available. See website for more information

FIRE EXTINGUISHER STAND:

A plastic fire extinguisher stand that is ideal for temporary use on construction sites.

Typical Uses: Ideal for temporary use on construction sites

Construction: Designed to hold all sizes of portable fire extinguishers from 5-20 pounds. Stackable with water drain holes, a flag insert hole and handle cutouts for easy maneuverability

Material: Polypropylene, red

CAVALIER SERIES: BRONZE OR BRASS

FIRE-FX2 UP TO 2 HR

1057S21
US3 Polished Brass

1045V10
US10 Satin Bronze

PRODUCT DETAILS:

Select the beauty and lustrous finishes of bronze or brass to add that upscale look to your next project.

Trim & Door Material: Bronze or brass

Trim & Door Finish: US10 Satin bronze, US3 polished brass

Tub Material: Cold rolled steel with white powder coat. Surface mount models match trim material

Door Pulls: Material matches finish of cabinet

CLEAR VU SERIES: ACRYLIC BUBBLE

FIRE-FX2 UP TO 2 HR

1535G25

1515F25

PRODUCT DETAILS:

An attractive bubble cabinet for one or two fire extinguishers with five material options to match the decor.

Trim & Door Material: Cold rolled steel, 304 stainless steel, aluminum, bronze or brass

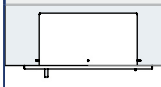

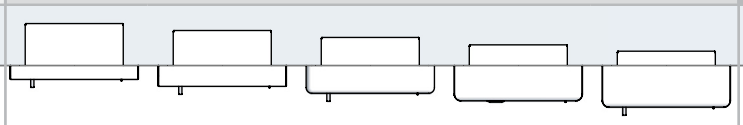

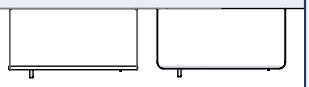

Finish: White powder coat, #4 stainless, clear anodized aluminum, US10 satin bronze or US3 polished brass

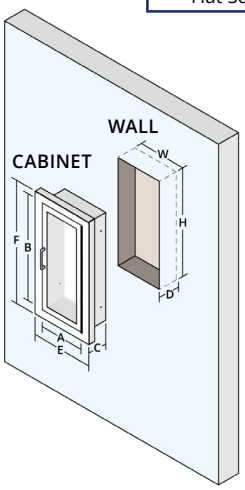

Bubble: Acrylic bubble allows 180° extinguisher visibility. 2-½" projection for 1500 Series, 3-½" projection for 2500 and 4500 series

Tub: Constructed of cold rolled steel with white powder coat finish. Surface mount cabinets match trim material. Extinguisher must be mounted to back of tub using J-hook

ROYAL SERIES: FIRE BLANKET CABINETS

FIRE-FX2 UP TO 2 HR

PRODUCT DETAILS:

Combination Extinguisher & Blanket Cabinet: Designed to hold a fire extinguisher below and a fire blanket (included) on top of shelf

Material and Finish: Steel with white powder coat, aluminum anodized, 304 stainless steel #4

Door Styles: Full view, vertical duo, and more (see page 16)

Blanket: 62" x 80" x 2.75 lb., processed 70% wool/30% synthetic fire blanket that meet the Code of Federal Regulation 16 CFR Part 1610 Standard for Flammability of Clothing Textiles (PN: 077-2)

Roller Blanket Cabinet: A steel roller type blanket cabinet for emergency use. The included blanket is attached to the vertical roller and comes with arm loops to enable a person to wrap themselves in a blanket in one continuous motion

Drop Blanket Cabinet: A steel "drop" blanket cabinet includes folded blanket. Handle is pulled down to open the bottom mounted door, which then releases the blanket to drop out

CROWNLINE 6000-7200 SERIES: FD VALVES/HOSES/EXTINGUISHERS

FIRE-FX2 UP TO 2 HR

PRODUCT DETAILS:

Trim & Door Material: Cold rolled steel, 304 stainless steel or aluminum
Finish: White powder coat, #4 stainless, clear anodized aluminum
Tub: White powder coated cold rolled steel. Surface mount models are same material as door & trim
Knockouts: Hose and valve cabinets include dual knockouts for 1-1/2" and 2-1/2" diameter pipe located each side of tub, except for surface-mount and fire-rated, that are by others during installation
Trim Style and Depth: Rolled edge aluminum trim is formed of extrusions. Surface mount steel and aluminum have square edge, stainless models have rolled edge

CROWNLINE 8000 SERIES: FD VALVES/HOSES/EXTINGUISHERS

FIRE-FX2 UP TO 2 HR

8516V10

PRODUCT DETAILS:

Trim & Door Material: Cold rolled steel, 304 stainless steel or aluminum

Finish: White powder coat, #4 stainless, clear anodized aluminum

Tub: White powder coated cold rolled steel. Surface mount models are same material as door & trim

Knockouts: Hose and valve cabinets include dual knockouts for 1-1/2" and 2-1/2" diameter pipe located each side of tub, except for surface-mount and fire-rated, that are by others during installation

Trim Style and Depth: Rolled edge aluminum trim is formed of extrusions. Surface mount steel and aluminum have square edge, stainless models have rolled edge

FB SERIES: FIBERGLASS CABINET

The FB Series is a durable, surface mount fiberglass cabinet that is resistant to salt air, chemicals, moisture, dust, insects and temperature extremes. Fits up to 20 lb fire extinguishers.

PRODUCT DETAILS:

Construction: Door and tub are UV-resistant fiberglass with high-visibility red finish and 5" x 9" Fire Extinguisher Lettering

Door: Gasketed door with 6" x 9" gasketed view window and corrosion-resistant aluminum handle. All cabinets come standard with a full length stainless steel hinge attached by rivets. Door is tightly latched against the silicone gasket by two stainless steel snap latches

Fire-Rated Option: No

FIRE HOSE EQUIPMENT SERIES

HECIR

HECIRL
Model With Legs

This durable storage cabinet has cold rolled steel or galvanneal steel construction for interior or exterior use. The top is angled with a 3" overhang to shed water.

PRODUCT DETAILS:

Construction: 16 gauge galvanneal or cold rolled steel construction. Both are finished with red powder coat paint and features a shelf and louvers on both sides of cabinet for ventilation. Optional 12" legs

Mount: Available without or with 12" legs

Options: 18" or 24" legs, locking chrome handle (must be ordered with cabinet to integrate rod latching system)

Accessory Decals:

- DFFHl "FIRE HOSE" horizontal 8-3/4"x3-1/2", red letters on black
- 1403 "FIRE HOSE" horizontal 4"x9", red letters on black

HRA

HRA SERIES: FIRE HOSE PIN RACK ASSEMBLY

Pin rack assembly includes a single jacket 1-1/2" hose for one-person operation. This basic unit contains the entire assembly including nozzle and couplings.

PRODUCT DETAILS:

Operation: One-man operation for immediate means of fire control

Ratings: 100 GPM at 65 psi at the nozzle. Hose is FM-approved, industrial fog nozzle, angle valve and pin rack are UL-rated

SECURITY SERIES

FIRE-FX® UP TO 2 HOURS

JL Security and Detention Cabinets for fire extinguishers, fire hoses or fire department valves are constructed to meet maximum security requirements in areas where fire protection is required.

CSF8513 with Optional Detention Deadbolt & Color

CSF2033 with Detention Deadbolt

PRODUCT DETAILS:

Cabinet Material & Finish: Cabinet is fully welded. Door are flush and attached with heavy duty continuous hinge

Construction: Cabinet is fully welded. Doors are flush and attached by a heavy duty continuous hinge. Knockouts provided on non fire-rated valve and hose cabinets

Knockouts: Hose and valve cabinets include dual knockouts for 1-1/2" and 2-1/2" diameter pipe located each side of tub, except for surface-mount and fire-rated, that are by others during installation

Trim Style & Depth: Fully Recessed with flat trim, Semi-recessed with 2-1/2" profile square trim or Surface mount model with square edge. Heavy duty masonry anchors are welded to frame on all recessed cabinets

Locks: Mortise cylinder, mortise deadbolt, detention deadlock or detention slam lock

Options: Other powder coat colors

SCHOOL SERIES

FIRE-FX® UP TO 2 HOURS

JL School Cabinets for fire extinguishers are constructed of heavy duty materials for rough duty applications, and offer a range of durable options.

CS2013F17

PRODUCT DETAILS:

Cabinet Material: 12 gauge cold rolled steel or 14 gauge 304 stainless steel

Trim Style: Flat trim, semi-recessed and surface-mounted. All have a square edge

Door, Tub & Trim Finish: White powder coat paint, #4 stainless steel

Options: Other powder coat colors

LIGATURE RESISTANT GUARDSMAN™ SERIES

FIRE-FX2® UP TO 2 HOURS

JL Industries offers a ligature resistant fire extinguisher cabinet designed for behavioral health and other institutional occupancies where additional safety and security precautions are required. Features include angled trim styles and a lockable solid door with a concealed rod hinge design.

CLSS2035M5 with optional stainless steel tub and mortise green core lock

CL1013M2

PRODUCT DETAILS:

Tub Material & Finish: Steel white powder coat, 22 gauge

Trim Material & Finish: Steel white powder coat, 16 gauge

Trim Projection: 3/16" flat angled, 3" angled, surface-mount angled

Door Material & Finish: Steel white powder coat, 16 gauge

Door Style: Solid

Hinge: Stud rod, opens to 95°

Lock: Mortise cam lock with two keys installed

Options:

- **Material:** 16 gauge stainless steel #4 door/trim
- **Lock:** Cylinder lock with two keys, green core mortise cam lock with control key and lock key
- **Alarms:** Commander alarm
- **Finish:** Red, black, other powder coat colors

CLASSIC™ SERIES: GALVANNEAL OR ALUMINUM

Our Classic Series provides a durable cabinet for use in exterior or damp conditions. Select from a wide rage of sizes that will fit most 2-½ - 10 lb extinguishers.

PRODUCT DETAILS:

Tub and Door Frame: White powder coated cabinet of rust-resistant galvanneal steel, or aluminum
Door: .060" acrylic front for protection from the elements. Breaker bar and lock standard
Trim: Surface mount or semi-recessed versions with a 2-¾" or 4-½" trim flange
Fire-Rated Option: No
Options: See page 33 for other powder coat colors

5113N20

502AN20

ECONOMYLINE™ SERIES: SURFACE-MOUNTED

A cost effective selection in either an aluminum or steel cabinet that can be locked with a padlock for tamper-resistance.

PRODUCT DETAILS:

Construction: Available in steel or aluminum. Both materials painted in powder coat paint
Door: Sliding .060 clear acrylic front with retainer clip. Breaker bar with chain, pre-drilled holes on top lip for padlock
Fire-Rated Option: No
Options: See page 33 for locks, other powder coat colors

5019G20

521AN20

DECORLINE™ SERIES: STEEL OR ALUMINUM

The Decorline Series offers an economical solution for interior or exterior applications. Select from a wide range of sizes that will fit most 2-½-10 lb extinguishers. Choose from semi-recessed or surface mount.

PRODUCT DETAILS:

Construction: Cold rolled steel tub (interior) or aluminum (exterior) with white or gray hammertone powder coat finish
Trim: Surface mount or semi-recessed with a 2-½", 3", or 4-⅜" trim
Door: Models with "AN" designation have slide in acrylic front secured by clips and tab for lock at top. All other models have door with continuous hinges and either solid door or door with acrylic window top and breaker bar with chain
Fire-rated Option: No
Options: See page 33 for locks, other powder coat colors

Chief (white) showing hammer break tool

Chief (red) showing optional break bar

Island Chief (red)

Island Chief (white)

CHIEF SERIES:

SURFACE-MOUNT, PLASTIC, BREAK PANEL

Cato's affordable fire extinguisher series, manufactured in the U.S, provides a dent and rust proof alternative to metal. Cato's Chief series fire extinguisher cabinets feature a security hexagonal lock and key to open and remove the trim and acrylic panel, which features scored lines to easily break when struck with tool in case of fire.

Tub and Trim Material: Injection molded high impact polystyrene in .110 thickness with ultra-violet inhibitors for UV resistance

Tub and Trim Colors: Available in red or white

Cover Material: .080 Acrylic front panel, grid scored for improved emergency access with break tool

Acrylic Colors: Available in clear or red (for best outdoor UV resistance)

Break Tool: Polypropylene injection molded aluminum tipped hammer with ribbed grip handle and a clear nylon coated stainless steel cable that matches trim color

Break Tool Option: Stainless steel break bar

Decals: UV resistant "FIRE" and "Break Panel" decals included

Hardware: ABS hexagonal lock and keys (2 included) are used to remove the trim and pull panel cover to open the cabinet

Sizes: Refer to table, listing model sizes with their compatible extinguishers from 2.5 - 20 lbs

Additional Options: Fire extinguisher rust prevention tray

ISLAND CHIEF SERIES:

SURFACE-MOUNT, PLASTIC, PULL PANEL

Cato's Island Chief series fire extinguisher cabinets are MRI safe and feature a clear PETG hand-pull panel to easily gain access in case of fire. The cabinet can also be opened using the security hexagonal lock and key to remove the pull panel cover.

Tub and Trim Material: Injection molded high impact polystyrene in .110 thickness with ultra-violet inhibitors for UV resistance

Tub and Trim Colors: Available in red or white

Cover Material: .030 PETG (polyethylene terephthalate glycol) panel with oval notch cut out to complete the pull panel design

Panel Colors: Available in clear only

Decals: UV resistant "FIRE" labels on exterior tub sides, "Tampering is a Felony" and MR Safe labels on pull panel

Hardware: ABS hexagonal lock and keys (2 included) are used to remove the trim and pull panel cover to open the cabinet

MRI Safety Information: MR Safe labeled, as defined in ASTM F2503. This product is safe to use in a magnetic resonance imaging environment. It is composed of materials that are electrically non-conductive, non-metallic and non-magnetic.

Sizes: Refer to table, listing model sizes with their compatible extinguishers from 2.5-20lbs. Including non magnetic extinguisher models Nebula, Sentinel and Ansul CleanGuard

Additional Options: Fire extinguisher rust prevention tray

Chief Pull to Open (white)

Chief Pull to Open (red)

Chief Semi Recessed only available in white shown with included decal CL-412 "Fire Extinguisher"

CHIEF PULL-TO-OPEN SERIES:

SURFACE-MOUNT, PLASTIC, HINGED DOOR

Cato's Chief Pull-to-Open series fire extinguisher cabinets feature a unique hinged acrylic door style with pull handle to allow quick access in case of fire.

Tub and Trim Material: Injection molded high impact polystyrene in .110 thickness with ultra-violet inhibitors for UV resistance

Tub and Trim Colors: Available in red or white

Cover Material: .080 Acrylic front panel

Acrylic Colors: Available in clear only

Decals: UV resistant "FIRE" and "Pull Handle Firmly" decals included

Hardware: Black ABS Handle 3.75" long with a 1.25" projection, two stainless steel hinges, a zinc plated roller catch with strike plate, and hexagonal lock with key installed to secure trim to tub

Sizes: Refer to table, listing model sizes with their compatible extinguishers from 2.5 - 11 lbs

Additional Options: Fire extinguisher rust prevention tray

CHIEF SEMI RECESSED SERIES:

SEMI RECESSED, PLASTIC, HINGED DOOR

Cato's Chief Semi Recessed fire extinguisher design is built with a 2.875" trim projection and meets ADA cabinet projection requirements. The hinged door is designed with an acrylic window and pull handle.

Tub and Trim Material: Injection molded polypropylene in .15 thickness

Trim Style: 2-⅞" rounded edge

Tub and Trim Colors: Available **white** only

Cover Material: .080 Acrylic front panel

Acrylic Colors: Available in clear only

Decals: Red vertical "FIRE EXTINGUISHER" decal included, mounts to door or panel

Hardware: Stainless steel hinge, glass clip, handle and roller catch

Sizes: Refer to table, listing model sizes with their compatible extinguishers from 2.5 - 10 lbs

Additional Options: Fire extinguisher rust prevention tray, cylinder lock with flexible cam
