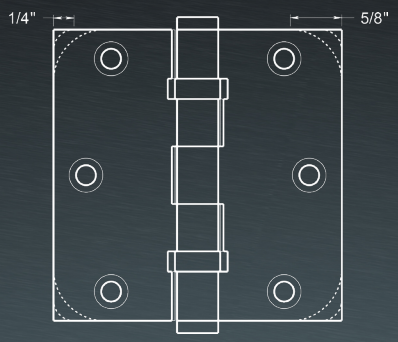
How to Determine the Radius of a Hinge

To determine if you have 1/4" or 5/8" radius corner hinge, measure the beginning of the curve to where the corner of the hinge would be if it were square.



Location of Hinge on the Door

Upper hinge 5" from top jamb to top edge of barrel.
Bottom hinge 10" from bottom edge of barrel to finished floor.
Middle centered between top and bottom hinges.

How to Select the Proper Hinge Size

To choose the proper hinge size consider the following:

THICKNESS OF DOOR	WIDTH OF DOOR	HEIGHT OF HINGE
1-3/8" Door	To 32"	3-1/2"
1-3/8" Door	32" to 36"	4"
1-3/4" Door	To 36"	4-1/2"
1-3/4" Door	36" to 48"	5"
1-3/4" Door	Over 48"	6"
2", 2-1/4", 2-1/2" Door	To 42"	5" Commercial
2", 2-1/4", 2-1/2" Door	Over 42"	6" Commercial

Number of Hinges per Door

As a general rule you will want to use 1 hinge per every 30" of door or fraction thereof. Referring to door height:
Doors up to 60" need 2 hinges. Doors over 60" but not over 90" need 3 hinges. Doors over 90" but not over 120" need 4 hinges.

HINGES / FULL MORTISE / EXTRUDED / SOLID BRASS

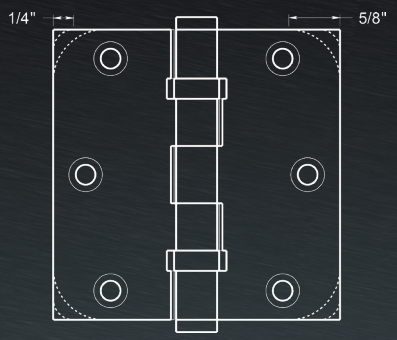
How to Determine the Radius of a Hinge

To determine if you have 1/4" or 5/8" radius corner hinge, measure the beginning of the curve to where the corner of the hinge would be if it were square.



Location of Hinge on the Door

Upper hinge 5" from top jamb to top edge of barrel.
Bottom hinge 10" from bottom edge of barrel to finished floor.
Middle centered between top and bottom hinges.

How to Select the Proper Hinge Size

To choose the proper hinge size consider the following:

Thickness of Door	Width of Door	Height of Hinge
1-3/8" Door	To 32"	3-1/2"
1-3/8" Door	32" to 36"	4"
1-3/4" Door	To 36"	4-1/2"
1-3/4" Door	36" to 48"	5"
1-3/4" Door	Over 48"	6"
2", 2-1/4", 2-1/2" Door	To 42"	5" Commercial
2", 2-1/4", 2-1/2" Door	Over 42"	6" Commercial

Number of Hinges per Door

As a general rule, you will want to use 1 hinge per every 30" of door or fraction thereof. Referring to door height:
Doors up to 60" need 2 hinges, doors over 60" but not over 90" need 3 hinges and doors over 90" but not over 120" need 4 hinges.

NRP

A hinge equipped with a non-removable pin cannot be disassembled without first opening the hinge to reveal the set-screw embedded perpendicularly on its inside face.

These are commonly found on outswing exterior doors that require their pin barrels to be exposed on the outside of the installation.

If not available, the NRP feature can be added upon request to any hinges with the exception of Stainless Steel hinges. In the case of Stainless Steel Hinges, the option can't be added. For available Stainless Steel NRP ready hinges see pages 3-2 & 3-3.

This is an unfamiliar but useful piece of hardware to lock pocket doors. It is mounted on interior side of a pocket door near the jamb face. When the top half is pushed in the bottom half pops out preventing the door from returning into its pocket.

A strike is provided to protect the jamb. Emergency release is accomplished by drilling a small hole on the exterior face of the door. Insert a thin object into this hole to push the rocker back into the unlocked position.

Series Functions and Options

Outside / Inside	Type	Function Description
	Entry	Exterior side can be locked using a key on the exterior or a mechanism on the interior side. Designed for interior use only.
	Privacy	Exterior side can be locked on the interior side. In an emergency, it can unlock from the exterior using a coin or a screwdriver. Good for use with bedroom and bathroom doors.
	Passage	Always unlocked. Latchbolt operated by lever/knob from either side. Good for use with closets and doors that do not require locking.
	Single Dummy	A dummy knob/lever mounts to one side of a door, does not operate, and is designed for doors that do not have a bore hole. Dummies work well for ball catch doors and other applications where a latch mechanism is not needed and the look of a knob/lever is desired.
