GATE CLOSERS

LOCINOX[®]

A gate closer? What's the added value of that?

Ever since the development of the first gate closers, years ago, my focus has been on the safety of residents and users. Whether the gate's installed in a residential (home), industrial (business) or public (school) setting. The weakest point in a fence can be the gate, if it isn't sturdy and self-closing.

My point of departure has always been the individual. I myself wondered: How do I behave at a pedestrian gate? Do I always close it myself? Or do I count on something to close the gate automatically? Do I leave that assurance to a gate closer? How quickly should the gate close and when does the final snap kick in?

"Protect the things your customers love: children, pets, employees and valuables."

In turn, my technical mindset lies at the heart of premium gate closers, which can be mounted worldwide, for example, due to their temperature independence. In this brochure, you'll discover much more about our 'closure' solutions. The Locinox gate closers give you and your customers complete peace of mind. So, be sure to include the gate closer in the overall approach to the fences you're installing. Or offer it for the gates you've already installed.

Joseph Talpe
Founder Locinox

If you're going for a gate closer, you better go for the best.

Locinox® gate closers are technical and aesthetic masterpieces. Two characteristics that suit you as an installer. This page gives you a sneak peek.

Constant closing speed

Champions have their qualities

Speaking in terms of sports: Our gate closers would win Olympic gold. So, you'll undoubtedly also score with these strengths.

✓ FIT & FORGET

Assembly is simple and assisted by clear installation videos. Once installed, you no longer have to worry about it. Our closers are maintenance-free.

✓ SPECIALLY FOR PEDESTRIANS AND OUTDOOR USAGE

Locinox® gate closers are more than simple interior door closers, but they're not oversized car port systems either. They're specially developed closers for outdoor pedestrian gates that have intensive use.

✓ SUITABLE FOR ALL TEMPERATURES/CONTINENTS

Thanks to our Active Thermal System, varying closing speeds due to temperature fluctuations are a thing of the past.

A solution for every pedestrian gate

Our handy gate-closer configurator helps you find the right gate closer: There's no gate model that we don't have a solution for. Let us introduce you to our line up

Our handy gate-closer configurator helps you find the right gate closer:

RELIABILITY DUE TO YEARS OF R&D

Our engineers only let the models leave the drawing board once they're 100% satisfied. Based on their years of experience in the field and your feedback, they've been able to optimise the gate closers even further.

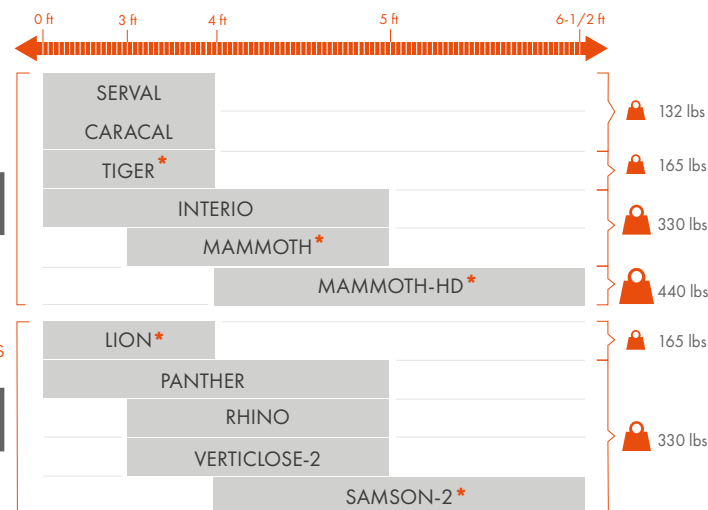

STATE OF THE ART

All our self-closing gate systems are waterproof and dustproof, adjustable in speed and final snap and they comply with PMR, ADA and ROSPA regulations.

GATE CLOSER & HINGE IN ONE

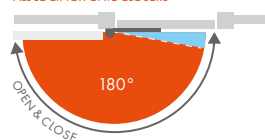

USE WITH EXISTING HINGES

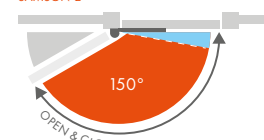

OPENING ANGLE

ALL LOCINOX GATE CLOSERS

* Fits chain link with optional brackets

SAMSON-2

INTERIO (125°) & PANTHER (120°)

Self-closing Final snap

Max. 150° depending on position of hinge and gate closer

Depending on position of hinge and gate closer

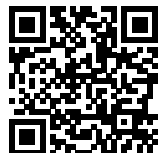

For new gates
(New fit – gate closer and hinge in one)

↔ 6 ft 📏 330 lbs ▶ 120°

✓ Adjustable speed and final snap

NEW

Motorized gate closer that also opens

VENUS

The Venus is a ready-to-use motorized gate closer for outdoor pedestrian gates.

The compact all-in-one gate operator can be easily installed on any type of post and hinge thanks to three different arm types. A simple app guides you through the plug-and-play programming. Thanks to a unique and innovative system, the operation of the motor is not impacted by manual or heavy-handed opening of the gate. In combination with access control, the Venus also works as a gate opener.

↔ 4.6 ft 📏 220 lbs ▶ 175°

✓ Adjustable speed and final snap

VERTICLOSE-2 WALL

Powerful and all-round gate closer for wall mounting

↔ 5 ft 📏 330 lbs ▶ 180°

✓ Suitable for 90° hinges
✓ Adjustable speed and final snap
