Degree Mortise Cylinder, Degree Key and Degree 6300 Series Core

The Degree® Advantage

Degree® Key System

The Degree Key System

The patented Degree system from SARGENT provides the right level of security for each opening in your facility. Three levels of ANSI/BHMA Grade 1 protection, from patented keyway to UL437 certified, secures every opening. A common key for all three levels of security enhances key control and simplifies administrative procedures. Key blanks are controlled through authorized distribution and geographical protection is available. Available for mortise, rim, component and Large Format Interchangeable Core (LFIC) cylinders, SARGENT offers the right Degree of protection for every door in your facility.

Benefits

- Patent protection from unauthorized key duplication through 2027
- New keyway family protects system integrity from legacy systems
- Keys are significantly stronger than competitive systems
- User-friendly design with minimal components provides easy field service
- Availability in all existing SARGENT cylinder types provides cost-effective upgrade for SARGENT facilities
- Bump resistance for added protection

Degree Level 1 (DG1) features a utility patented keyway and provides protection against bumping for mortise, rim and component fixed cylinders. These cylinders easily retrofit into existing hardware and are appropriate for most applications. The keys for DG1 can only open DG1 cylinders.

Degree Level 2 (DG2) builds on the utility patented keyway of DG1 and adds patented side bar locking with unique angled bottom pins that provide end users with geographical exclusivity. Cylinders provide protection against bumping and picking. Because of its superior key control and patent protection until 2027, DG2 products are recommended for use in conjunction with DG3 for new installations or when retrofitting systems, including large format interchangeable core systems.

Degree Level 3 (DG3) combines the utility patented keyway and side bar locking with unique angled bottom pins that provide end users with geographical exclusivity, and adds certification to UL437. They are classified as high security because of their superior resistance to physical attack and protection against unauthorized key duplication. Because of its superior key control, patent protection until 2027, and physical strength, we recommend DG3 products for new high-security installations or when retrofitting systems, including large format interchangeable core systems. SARGENT also offers anti-vandal and high security locksets that complement DG3 cylinders for those openings most vulnerable to attack.

IMPORTANT: Sargent Degree Product is available with a "0" cut depth for DG1 systems **only** and it is not available for use in a DG2 or DG3 security level product. If there is a possibility to elevate the DG1 system to DG2 or DG3, any master keying expansion requests should be discussed with a Sargent Key Records team specialist.

Applications

Degree is recommended for installations requiring patented key control protection including protection from picking and/or drilling, all available in one locking system. Degree is ideally suited for Educational and Healthcare facilities, Industrial and Commercial buildings.

Features of the Degree Key System

	DG1	DG2	DG3
Utility patented until 2027	Х	Х	Х
Key blank distribution restrictions	Х	Х	Х

Convenient, simple to service	Х	Х	Х
New keyway family and keying specifications from previous SARGENT systems	Х	Х	X
Can be masterkeyed with all Degree levels and LFIC	Х	Х	Х
Certified to UL437			Х

Product Specifications

All cylinders shall be utility patented, bump resistant and require the use of a patented key. All cylinders shall be available in any of the mortise, rim, key-in-knob/lever, auxiliary locks, padlocks or large format interchangeable core types.

Degree offers three distinct security options from which facilities can select the appropriate degree of security for any door. Degree provides the ultimate in key control by simplifying ordering processes and by allowing the system administrator to determine the level of protection for system components. Additional specifications are found on page 22.

Keying Specifications

Keying

- Degree is a factory-based key system
- 6 pin cylinders furnished with two nickel silver keys per cylinder. Degree cylinders may be furnished master keyed, or grandmaster keyed to a specific facility. Double cylinder lock sets keyed alike on both sides will get two change keys total
- Degree's one-key design allows the use of all three locking mechanisms within the same system to be operated with just one key
- Degree systems are independent and cannot be keyed into existing and/or conventional SARGENT master key systems
- Cross keying is not recommended. Keying Department Administration will review all requests and determine if compatible with a secured master key system

Note: DG1 systems using 7 depths of cut cannot be integrated with DG2 or DG3 systems.

UL 437 Listed Cylinders

SARGENT DG3 cylinders* are UL437 Listed. UL437 sets the standard for both drilling and picking resistances.

These cylinders are manufactured to include hardened drill resistant inserts in both the plug/barrel and body.

UL437 High Security DG3 cylinders are recommended for doors most likely to be physically assaulted, while the use of standard DG1 and DG2 cylinders is more advantageous and less costly for interior doors.

* Note: DG3 cylinder offerings include mortise, rim and bored cylinders in conventional as well as Large Format Interchangeable Core

Patent pending and/or patent www.assaabloydss.com/patents

System Administration

Degree® Key System

Degree System Administration

All SARGENT Degree key systems must have a signed System Information Document (SID), located in the back of this catalog and available online, for each facility. The SID designates a primary systems administrator for the facility. Unless otherwise indicated by the primary systems administrator by way of a separate specific letter of authorization, all shipments for Degree product will go to the shipping address on the Systems Information Document.

All key blanks are to remain in the possession of the facility and must be accounted for. Any defective, incorrectly cut or damaged key blanks must be destroyed.

For Degree DG2 and DG3, specific randomized security codes will be required for each order unless the systems administrator opts out of this feature. For more information, see the Systems Information Document.

Keyway Administration and Assignment

All keyways will be noted on the master key system bitting list. SARGENT Keying Department Administration will assign all DG keyways. Keyways will be assigned according to facility type, geographic location and keying system specifications. All keys will ship directly to the end user.

All master key systems will be registered with Keying Department Administration and all bittings will be factory created.

Key Control

Key control will be maintained by using the SARGENT Keying Authorization Document. For a copy, contact Keying Department Administration or visit our web site at www.sargentlock.com. System information and/or systems related product will be forwarded directly to the owner, unless otherwise indicated by the owner's appointed administrator.

Authorized Distributors

SARGENT Degree is a system-based product and is provided through authorized distribution. An authorized distributor may stock and service products upon specific written authorization from the primary system administrator of the facility.

Authorized distributors who carry inventory for a specific facility's system must provide valid receipts and disbursements of all products, specifically key blanks/cut keys. All key blanks in the possession of an authorized distributor must be accounted for. Any defective, incorrectly cut or damaged key blanks must be destroyed.

Refer to pages 24 and 25 for a copy of the SID and more information.

DG1-, DG2- & DG3- Series Mortise Cylinders

For use with Mortise Locks, Exit Devices and Auxiliary Locksets

Mortise Fixed Core (FC)

SARGENT standard cam shown

Standard Degree Mortise Cylinders supplied with:

- Solid brass, 6 pin cylinder, 1-5/32" (29mm) diameter
- T keyway family standard see page 18 for available keyways
- Optional collars are offered and to be ordered separately, consult individual catalogs for
- Offset cam DG-0001 standard see available cams on page 7
- · Factory keyed

Options

- Construction Master Keying (21- option)
- Allows use of construction keys until change key voids operation
- Ships with 6 master construction keys separate from change keys
- Removable Disposable Construction Core (60-option)
- Operate with coin or flat screw driver
- Easy installation
- Removable Core (63- option)
 - Control key releases locking cam for removal of core
- Control keys ordered separately
- Removable Construction Keyed LFIC (64-option)
 - Furnished with 6 keys and 1 control key standard
 - Plug face dimpled for easy identification
- Unassembled Cylinder (65- Option)
- DG1 and DG2 only
- Includes two key blanks but no pins, springs
- When ordered with hardware, 65-DG cylinders are packed uninstalled with hardware
- Available on existing systems only

- Exposed Plug only (78- option)
- Exposed plug .560" (14mm) diameter
- For use with trim LE3/LE4 & KE3/KE4; specify 78- only when cylinder is ordered less
- Supplied with standard offset cam DG 0001; optional cam 105 for use on inside of 7816/8216/9200 locks only
- Hotel function§
 - 7850 or 8250 hotel function mortise locks require a 50- cylinder where change keys and master keys have limited rotation that only allow latch bolt retraction
 - #115 cam supplied standard with 50 function hotel locks & cylinders
 - The #115 cam is supplied only with SARGENT 7850/8250 locks
- Guest and Master keys will only retract the latch bolt but not project or retract the dead bolt
- Emergency keys, ordered separately, retract or project the latchbolt and deadbolt (p/n DG7268 EMK)
- Available in #43 (1-3/8") and #44 (1-1/2") cylinder lengths
- Hotel function available with Large Format Interchangeable Core (63-), Plastic Disposable Temporary Core‡ (60-) & Construction Core‡ (64-)
- ‡ Note: 60- & 64- will retract Latch only, it will not retract the deadbolt

§ DG2 & DG3 cylinders are not available as Hotel function (50-)

6300 Series DG- Conversion Parts, Slide Block Kit & Shear Tool

Degree® Key System

SARGENT 6300 Series Housings and KIL/KIK

Older 6300 series mortise and rim cylinders with long pins in the housings will need to be modified to accept 6300 Series DG-

KIL/KIK lock sets with removable tail pieces will require new tail pieces as shown below.

6300 Series DG- Conversion Parts for #34 rim cylinders, 8-Line knob locks and 480 Series deadbolts

Kit # 13-5178 is used to convert rim cylinders with long pins to accept 63-DG Series cores and 11-63-series cores

Kit # 08-5265 for DG-63- Series and 11-63-8-Line knobs

Kit # 16-2519 for DG-63- Series and Cam Assembly for 11-63-Deadbolts

436-1 Slide Block Kit

- Includes fixture and staking tool for use with all DG- 6300 cores, and 11- and 10- 6300 series cores manufactured after March 2006 and standard cylinders manufactured after May 2008, simplifying top loading in the field.
- The kit includes:
 - 100 slides
 - staking block
- Cylinders manufactured after March 2006 will not include the box around the SARGENT logo and can be used with this kit.
- Additional slides available:
 - 7 pin slides (Part # 13-1797)
 - 6 pin slides (Part #13-1341)

Cores without a box around the word "SARGENT"

6300 Series DG- Conversion Parts for 758/858 Padlocks, 11 Line (T-Zone), 10, 7, 6500 Line

Note: Only existing 6300 cores with removable tailpieces can be upgraded to Degree without modifying the lock

431-6 Shear Tool

- 431-6 Shear Tool is used to alter older SARGENT 60-/63- mortise housings to accept 6300 Series DG cores and 11-6300 series cores.
- Altered housings will accept 6300 DG1-, DG2- and DG3- cores.

Note: DG3- cores with altered housings are not UL437 listed, DG3 cores require DG3 housings to be UL437 listed

For 6300 rim cylinders use Kit #13-5178

6300 Large Format Interchangeable Core Installation Tool (432 RC)

- The 432 RC is a tool to assist in installing SARGENT Large Format Interchangeable (Removable) Core Mortise Housings. This tool makes it easy to thread a cylinder body into a mortise lock and can also help check the cylinder function in a lock before installing the cylinder core
- Order: 432 RC for the SARGENT Large Format Interchangeable (Removable) Core Installation Tool

Experience a safer and more open world

Degree® Pin Kits

Degree® Key System

437 DG1 Standard Pinning Kit

The 437 DG1 Kit is used to pin DG1 fixed and LFIC cylinders. The heavy duty steel kit prevents pins from mixing.

The kit includes:

100 each of bottom pins sizes 0-6

- 100 each of control drivers sizes 1-12
- 100 each of driver pins sizes 1-10
- 100 each of bump resistant pins sizes 4-10
- 25 sidebar springs part number DG-0059
- 100 KIK spring cover part number 13-1341
- 25 KIL/MRT/RIM/LFIC spring cover DG-0040
- 10 each Sidebar (LFIC only) part number DG-2818
- 100 each compression spring part number DG-0017
- 100 each compression spring (LFIC only) part number DG-0097
- DG1 key key gauge part number 435DG

See pages 2 and 3 in the Technical Manual for individual pin part #s.

The kit has additional empty compartments for future upgrades to DG2 and DG3 cylinders.

The 437 DGM "Master Kit" has all pins needed for pinning DG1, DG2 and DG3 cylinders.

437 DGM Master shown

437 DGM Master Pinning Kit

The 437 DGM "Master Kit" includes all pins needed to re-pin DG1, DG2 and DG3 cylinders.

Kit includes all the same components as in the 437 DG1 kit, with the additional parts to service DG2 and DG3 cylinders.

10 each Side bar part number DG 0056

- 25 each slider spring part number DG 0060
- 100 each of Left, Center and Right "Chisel Bottom Pins" sizes 1 thru 6

See pages 2 and 3 in the Technical Manual for individual part numbers.

Cylinder Spray Lubricant

Degree cylinders are mechanical devices and require preventive maintenance. At a minimum, Degree cylinders should be lubricated twice a year; more if installed in extreme installations.

Degree cylinders should not be exposed to chemical washes or painted.

3.0 oz aerosol part number 18-0070

Cylinder Spray Cleaner/Deicer: 3.0 oz aerosol part number 18-0435

No. 1KB Rosette

B-1 1KB-2

1KB-3

1KB-4

- Used with 8200 Series mortise locks and No. 90 blocking rings when cylinders project from door
- Free spinning to protect cylinder from vandalism
- Consult 8200 series catalog for Rosette application details.
 Different collars required when used with exit devices. Consult Exits catalog for part numbers
- Furnished standard with 8200 Series sectional trim
- Cast brass, bronze or stainless steel
- 1-1/2" (38mm) diameter, includes compression spring
- Projection from door:

1KB-1 5/16" (8mm) 1KB-2 7/16" (11mm) 1KB-3 9/16" (14mm) 1KB-4 11/16" (16mm)

• Finishes: 3, 4, 9, 10, 10B, 10BE, 10BL, 15, 20D, 26, 26D, BSP, WSP

No. 97 Rosette

- Standard for 4800 dead bolts and 7900 and 7800 Series mortise locks
- Brass, bronze or stainless steel
- 1-11/16" diameter (43mm), 9/32" (7mm) projection, includes compression spring
- Finishes: 3, 4, 9, 10, 10B, 10BE, 10BL, 15, 20D, 32, 32D, BSP, WSP

No. 90 Blocking Ring

- Used with 1KB-2 and 1KB-3 rosettes as spacer when mortise cylinder projects from face of door as shown above
- Consult 8200 series catalog for Blocking ring application details
- Brass, bronze or stainless steel
- 1-3/8" (35mm) diameter; available in thickness of 1/16", 1/8", 3/16", 1/4" and 3/8" projection in 1/16" (1.6mm) increments. Specify size when ordering.
- Finishes: 3, 4, 9, 10, 10B, 10BE, 10BL, 15, 20D, 26, 26D, BSP, WSP

Crosscut illustration of rosette application

Cylinder Nut Wrench

This wrench simplifies the installation and removal of mortise cylinders nuts used on 700 Series Auxiliary Control (80 Series ET Trim).

Visual Key Control Tamper Proof Packaging

Degree® Key System

Visual Key Control (Stamping)

To allow for easier key and cylinder identification, SARGENT offers permanent stamping of keys and/or optional cylinder concealed stamping with industry standard alpha-numeric key set symbols.

All DG keys are stamped with key set symbol and "DO NOT DUPLICATE" as standard.

All DG master and control keys are stamped with the key set symbol and the key system register # cylinders as standard, (Item B) unless alternate stamping is requested on the order.

Master level keys do not include bitting numbers. Master level keys include system register numbers stamped on the first line and the standard visual key control designations on the second line (Item B).

Change keys have one line for up to 7 characters for key set stamping available for permanent Visual Key Control

- Key and cylinder identified by industry standard alpha-numeric keyset symbols
- Cylinder-slide stamping available on mortise, rim, LFIC and all bored cylinders except for 8-Line and 7600 (Items C, D, & E)
- Core side engraving available for 8-Line and 7600 (Item F)

Note: SARGENT will stamp alternate identity codes on cylinders and/or keys whenever requested. This alternate stamping can not be different if both are to be stamped. Master Level Keys can also be stamped with a single alternate code

Tamper Proof Packaging

Item D

For the highest level of security for the end user, tamper proof packaging is used on all Degree master keys and key blanks. This heat sealed shrink wrap identified with "SARGENT Sealed For Your Security" provides assurance of the integrity of the factory generated key system.

Master Keying & Cylinder Terms

Degree® Key System

SARGENT ASSA ABLOY

SARGENT requires all orders containing Master Keying details to be submitted using the industry standard Door and Hardware Institute (DHI) ANSI/BHMA format. Key symbols used on a master keyed order require combinations of letters and/or letters and numbers.

For complete details on proper structuring format of key symbols refer to: DHI Handbook, Section 8 - Finish Hardware, KEYING SYSTEMS AND NOMENCLATURE; ANSI/BHMA Standard A156.28, AMERICAN NATIONAL STANDARDS FOR KEYING SYSTEMS; or contact SARGENT for assistance at 1-800-727-5477.

Basic Keying Terms

Keys and terms	Abbreviation	Definition
Change key	CK	Individual lock key
Masterkey	MK	Operates any given quantity of cylinders with different key changes
Grand Masterkey	GMK	Operates all individual locks already operated by masterkey(s)
Great Grand Masterkey	GGMK	Operates all locks under the various masterkey(s) and grand master key(s) already established
Emergency Key	EMK	Operates hotel locks having shut out feature which blocks entry by all other keys
Construction Key	CMK	Operates all cylinders designated for a temporary period during construction
Control Key	CTL	Key to install or remove interchangeable or removable cores
Keyway	KWY	Broaching in a cylinder plug
Key Section	KWY	Sidewarding on key to match broaching in plug
Single Keyed	SKD	Cylinders operated by their change key only; not operated by any master key

Construction Master Keying (21- Option)

Degree® Key System

Construction Master Keying (Lost/Wafer Design) for DG1-, DG2- & DG3-

SARGENT Degree cylinders when master keyed are offered with the convenience of construction keying when specified with the 21- option. This is not recommended with DG3 key systems or any system where strict key control and management is enforced.

Construction keying simplifies the process when the building gets turned over. With this feature, the 21- cylinder is master keyed with a special

construction feature in one of the chambers. The plug is prepped in two places along both sides of the same chamber containing the construction feature. This allows the construction master key to be used during the construction phases.

It is highly recommended that all construction keys are collected and accounted for once the project is complete to protect the integrity of the key system. This is not recommended with DG3 key systems or any system where strict key control and management is enforced.

New systems supplied with 6 construction master keys unless otherwise specified. Orders to existing key systems that require additional construction keys are to be specified and ordered separately.

Orders with 21- will have all change keys shipped separately from hardware. Six construction master keys provided per system unless otherwise specified.

The 21- is not available with hotel function cylinders or large format interchangeable cores (6300 series). If construction keying is required for LFIC, specify 64-DG- construction keyed cores.

Cutaway cylinder showing construction master key being used, putting the wafer below the shear line while key is turned.

Note the two empty "donut" holes on either side of the chamber.

Change key inserted in cylinder putting the wafer at the shear line.

As **change key** rotates, construction wafer falls into "donut" hole in the side of plug. Only construction wafer will fall due to hole through its center. This voids the construction feature.

Change key rotated to position for extraction.

Construction key inserted after wafer is trapped. Driver now extends into plug chamber. Construction key if used will not rotate.

SimpleK Master Key System and Key Management Software

Cylinders and Components

SimpleK

SimpleK is a flexible and intuitive software program that streamlines and simplifies the complexities of managing master key systems, keys, and facilities. It combines all tools needed by locksmiths, facility managers, security officers, and anyone else involved in the key management processes.

The software provides total key control with audit trails, outstanding keys, overdue keys, tools for the rekeying process, and more. SimpleK software allows you to import maps and floor plans to see who has access to each individual door, the associated keys, and hardware on the opening.

SimpleK allows you to manage keys and keying systems of all sizes and types. This includes: Medeco, Corbin Russwin, Yale, SARGENT, ASSA, ABLOY, Schlage®, Best®, and many others.

Features:

- Advanced tools for locksmithing and key control
- Manage all key systems (unlimited number of records)
- Robust import tools to bring current data into SimpleK
- Interactive floor plans
- Master key system design and expansion

- Key requests, approvals, issuances, and returns workflow
- Cylinders and core pinning (verifies key interchange)
- Door-Key association visualization and rekeying solution
- Easily identify keys, access, and hardware on openings
- Visibility to audit trails and outstanding/overdue keys

Architectural Specifications

Degree® Key System

Part 1 - General

Keying Schedule-

- The keying schedule is just as important as the hardware
- The key meeting requirements

Who attends

Example: "Upon approval of the finish hardware schedule meet with the owner's representative to determine the project's keying requirements. In attendance shall be a Certified Key System Specialist."

Administrative documents should be reviewed and executed at this meeting.

Delivery, Storage and Handling-

• The delivery and storage of the permanent cylinders, cores, keys, key control software

Extra Material—

• Consideration should be given to include additional permanent cylinders, key blanks and key cutting equipment, etc

Part 2 - Product

Keying: (SARGENT Degree)—

All cylinders shall be SARGENT Degree. Provide utility patented cylinders that require the use of a patented controlled key. Provide bump resistant fixed core mortise and rim cylinders standard. Except where otherwise specified all locksets, exit devices and cylinders shall be of the same manufacturer. Provide recessed cylinder collars for all mortise and rim cylinders. Establish a new multilevel factory designed secured master key system for this project that will meet the owners requirements for this project and future expansion. All keying shall be done at the factory where permanent records will be established and maintained.

Manufacturer to have a minimum of 10 years experience designing secured master key systems and have a published security policy.

Provide a 6 pin multilevel master key system which is comprised of patented controlled keys, security and high security cylinders that can all be operated by ONE key of the highest level. Geographical exclusivity shall be provided for all security and high security cylinders. Provide certified cylinders meeting ANSI/BHMA A156.5-2010 Grade 1. Provide mortise, rim and key-in-lever cylinders certified to UL437 where specified.

Provide construction master keying for all fixed core cylinders. Provide temporary keyed cores for all large formatted interchangeable core cylinders. Permanent keys and cores are to be delivered directly to the owner or owner's representative. Provide nickel silver keys with industry standard Visual Key Control stamping on the bow only for each permanent cut key. Furnish keys in the following quantities.

- 1 each top master key for the system(s)
- 4 each Change keys per cylinder or 10 keys per keyed alike
- 2 each Control keys (if required)
- 2 each Master keys per master key group and/or selective
- 2 each Construction control keys (if required)
- 12 each Construction keys
- Provide 1 copy of bitting list to the owner

Where specified DG1; provide utility patented controlled keyway cylinders that are furnished with patented keys that are only available from authorized distribution. Provide bump resistant fixed core mortise and rim cylinders standard. Where specified DG2; provide utility patented controlled keyway and side bar locking incorporating unique angled bottom pins that provide end users with geographical exclusivity. Cylinders shall be constructed to provide protection against bumping and picking. Where specified DG3; provide utility patented controlled keyway and side bar locking incorporating unique angled bottom pins that provide end users with geographical exclusivity. Cylinders shall be constructed to provide protection against bumping, picking and drilling. Provide mortise, rim and key-in-lever cylinders certified to UL437.

Specified manufacturer Sargent Degree Key Control

• Specify Key Wizard software

Part 3 - Execution

Care should be taken to identify the required process of turning over a patented locking system to the owner.

Copyright © 2011-2024, SARGENT Manufacturing Company. All rights reserved. All rights reserved.

Degree® System Information Document Explanation

Degree® Key System

Degree DG1 Required Administrative Documents:

- <u>Mandatory</u>; all new systems will require a completed System Information Document (orders can not be entered without this document). The fully executed original document will be kept on file at Sargent Manufacturing.
- Subsequent order requirement. A letter of authorization will be required if the product is shipped to an address other than what's recorded on the System Administration Document, and/or if the address on the purchase order is different than what is listed on the System Information Document.

Degree DG2 & DG3 Required Administrative Documents:

- <u>Mandatory</u>; all new systems will require a completed System Information Document (orders can not be entered without this document). The fully executed original document will be kept on file at Sargent Manufacturing.
- Subsequent order requirement: A specific randomized security code will be required for each order unless "Opt-Out" has been authorized by the systems administrator.
- If the "Opt Out" option is **NOT** selected
 - o A correct system specific (randomized) security code must be included with each subsequent order.
 - Security codes are specific to each order.
 - o If the shipping address is other than the one listed on the System Information Document, a Letter of Authorization signed by one of the recorded authorized representatives of the facility is required.
 - Letter of Authorization must contain the same shipping address that appears on the customer's Purchase Order.
 - o Letters of Authorization will not be kept on file at factory.
 - o Without the proper security code, Letter of Authorization, or if the shipping address is other then what's listed on the System Information Document, the order cannot be processed.
- If the System Administrator elects not to use security codes as part of the authorization process, the "Opt Out" option can be authorized by the system administrator.
 - o If the "Opt Out" option **IS** selected
 - A system-specific security code is not required.
 - Letter of Authorization must be signed by one of the facility's authorized representatives.
 - If the shipping address is other then the one listed on the System Information Document, a Letter of Authorization will be required.
 - Letter of Authorization must contain the same shipping address that appears on the customer's Purchase Order.
 - Letters of Authorization will not be kept on file at factory.
